SITUATION SUMMARY

HIGHLIGHTS

The Bahamas

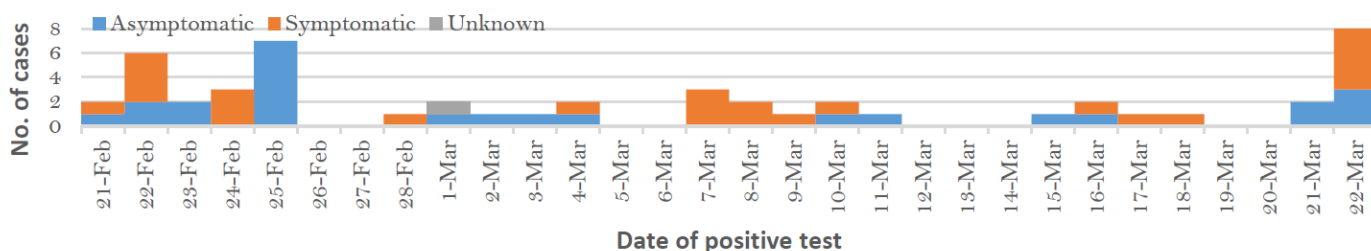

- The incidence of new COVID-19 cases and hospitalizations in country remains low, with the cumulative cases at a plateau.
- The Health Services (COVID-19) (Prevention and Management of Community Spread) Rules, 2021 and the Health Services (COVID-19) (General) Rules, 2021 remain in effect.
- On 22 March 2022, increased capacity to seventy-five percent of the total capacity was announced for churches, places of religious instruction and worship.

Turks and Caicos Islands

- The incidence of new COVID-19 cases in country remains low, with the cumulative cases at a plateau.
- For the fifth consecutive week, there has been no reported deaths.
- As of 23 March 2022, Cabinet approved the extension of COVID-19 measures and protocols to 30 April 2022 and the following changes:
 - Written permission no longer needed from the Chief Medical Officer or Chief Environmental Health Officer or and written permission and permit from the Department of Environment and Coastal Resources for public and private gatherings and social activities;
 - Self-isolation for five days if a person tests positive for COVID-19.

RESPONSE

PAHO/WHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines, technical assistance and situational updates related to the COVID-19 response.

The Bahamas

- COVID-19 vaccine distribution including extended and booster dose vaccinations continued throughout The Bahamas.
- As of 19 March 2022, 153,552 persons received their first dose of either the Astra Zeneca or Pfizer COVID-19 vaccine, and 163,526 persons were fully vaccinated including those who received the one dose Johnson & Johnson COVID-19 vaccine.
- Restrictions continue on the amount of traffic into and out of the Princess Margaret Hospital (PMH) and the Rand Memorial Hospital (RMH) in Grand Bahama. Emergency services are only being accommodated in the Emergency Departments.
- Moderate to severe COVID-19 cases continue to be treated at PMH, Doctors Hospital West and the RMH.
- The COVID-19 Mobile Unit continues to operate and provide vaccinations to individuals who are homebound, hearing impaired, mentally challenged, physically challenged, and visually impaired as well as their caretakers.
- COVID-19 laboratory PCR testing continues at the National Reference Laboratory (NRL), PMH, RMH and private sector laboratories.
- A National Respiratory Surveillance Genomics Database is in use by the NRL for genetic analysis. Several genomic deletions and variant mutations have been identified by the NRL.
- The Alpha, Delta, Gamma and Omicron variants of concern, and the Iota, variant of interest, have been confirmed in country.
- An on-line contact tracing course continues to be offered through the University of The Bahamas.
- Go.Data continues to be utilized for data collection of confirmed COVID-19 cases and contact tracing.
- Health visas are no longer needed for Bahamian citizens and permanent residences returning to The Bahamas.
- Incoming travellers and persons travelling from Grand Bahama or New Providence must present a negative COVID-19 test taken within 72 hours. For fully vaccinated persons, this may be a RT-PCR test or Rapid Antigen COVID-19 test and for non-vaccinated persons this must be a RT-PCR test.
- For visitors out to sea on the second day of their stay in-country, they must take a Rapid Antigen COVID-19 test at the first Port of Call and submit results to the travel health visa website.
- The Public Hospitals Authority continues to distribute personal protective equipment across all public hospitals and clinics.
- A Cuban health contingent of 42 Cuban specialized Nurses continues to support clinical care through a bilateral agreement between the two countries.
- Ministry of Health and Wellness continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.

- Ministry of Health and Wellness, in collaboration with PAHO/WHO and other partners, continues to implement a communication campaign to increase immunization coverage for influenza and other vaccines.
- Ministry of Health and Wellness, the Office of the Prime Minister and PAHO/WHO are collaborating on the implementation of a revised communication strategy for increasing COVID-19 vaccination coverage, informed by the results of a recent social mobilization project and vaccination survey.

Turks and Caicos Islands

- COVID-19 vaccine distribution continued throughout the islands, including for children ages 5-11 years of age.
- Persons 16 years and over are eligible and continue to receive booster vaccines.
- The Alpha, Gamma, Delta B.1.617.2 and Omicron Variants of Concern have been confirmed in-country.
- Persons continue to register for the COVID-19 vaccine via the online portal which is available in three languages: English, French-Creole, and Spanish.
- Go.Data continues to be utilized for field data collection and contact tracing investigations.
- Community drive-through services continue to provide access to COVID-19 tests throughout the islands.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing.
- The communication education campaign continues with communication materials on the COVID-19 vaccine shared via traditional means and social media.
- A Cuban health contingent of 20 persons continues to support operations in the TCI Hospitals through a bilateral agreement between the two countries.

GAPS/CHALLENGES

- Public compliance with public health protocols and vaccination hesitancy and resistance continue to present challenges in both The Bahamas and Turks and Caicos Islands. Vaccine hesitancy/resistance is of particular concern among vulnerable populations, health care workers and other emergency and frontline workers.
- While The Bahamas has capacity to identify the presence of COVID-19 variants, neither The Bahamas nor Turks and Caicos Islands have in-country sequencing capacity. This presents a challenge for the timely identification of new variants.
- Both countries are challenged by the limited global supply of Cepheid Test Kits and other supplies required for COVID-19 testing. Turks and Caicos Islands is particularly challenged as it is only possible for them to source Cepheid Test Kits through the United Kingdom Government.
- While a nursing shortage continues in The Bahamas, 42 Cuban nurses were hired to address this issue as well as staff burnout.
