

We have  
**a real  
opportunity**

to drive change  
and deliver longer  
and healthier lives

---

# PAHO seeks to end more than 30 diseases and conditions in the Americas by 2030

# In 2021...

El Salvador secured a **malaria-free** future following Argentina's and Paraguay's lead

14 May

And Dominica ensured that **no child was born with HIV or congenital syphilis**, joining 7 other countries in the Caribbean despite the impact of COVID-19 on public health systems

Ending these diseases  
is within our reach

The time is now!

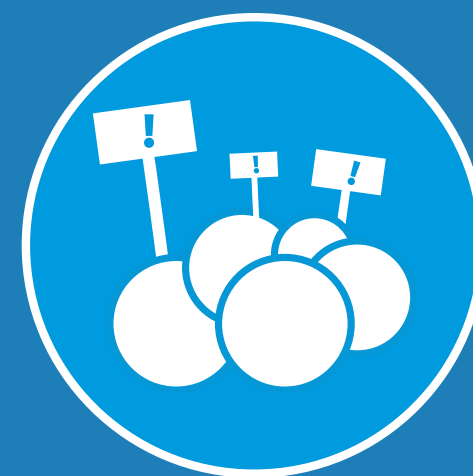

To achieve the last mile,  
we all need  
to work together

**Governments**

**Health**

**Civil society**

**Private sector**

**Local  
communities**

**Academia**

to ensure that  
**no one is left behind**  
and guarantee **Universal Health For All**

Let's turn this hope  
**into reality**
