

# THINK YOU'RE NOT AT RISK OF HEPATITIS? THINK AGAIN.

Hepatitis virus types A, B, C, D and E cause infection and inflammation of the liver that can lead to severe disease and death.

## HEPATITIS B, C & D

Spread by blood, semen and other body fluids

### 6 WAYS TO PROTECT YOURSELF

Talk to your healthcare provider about the hepatitis B vaccine

NEVER share needles, razors or toothbrushes

If you are pregnant, talk to your doctor about how to prevent transmission to your baby

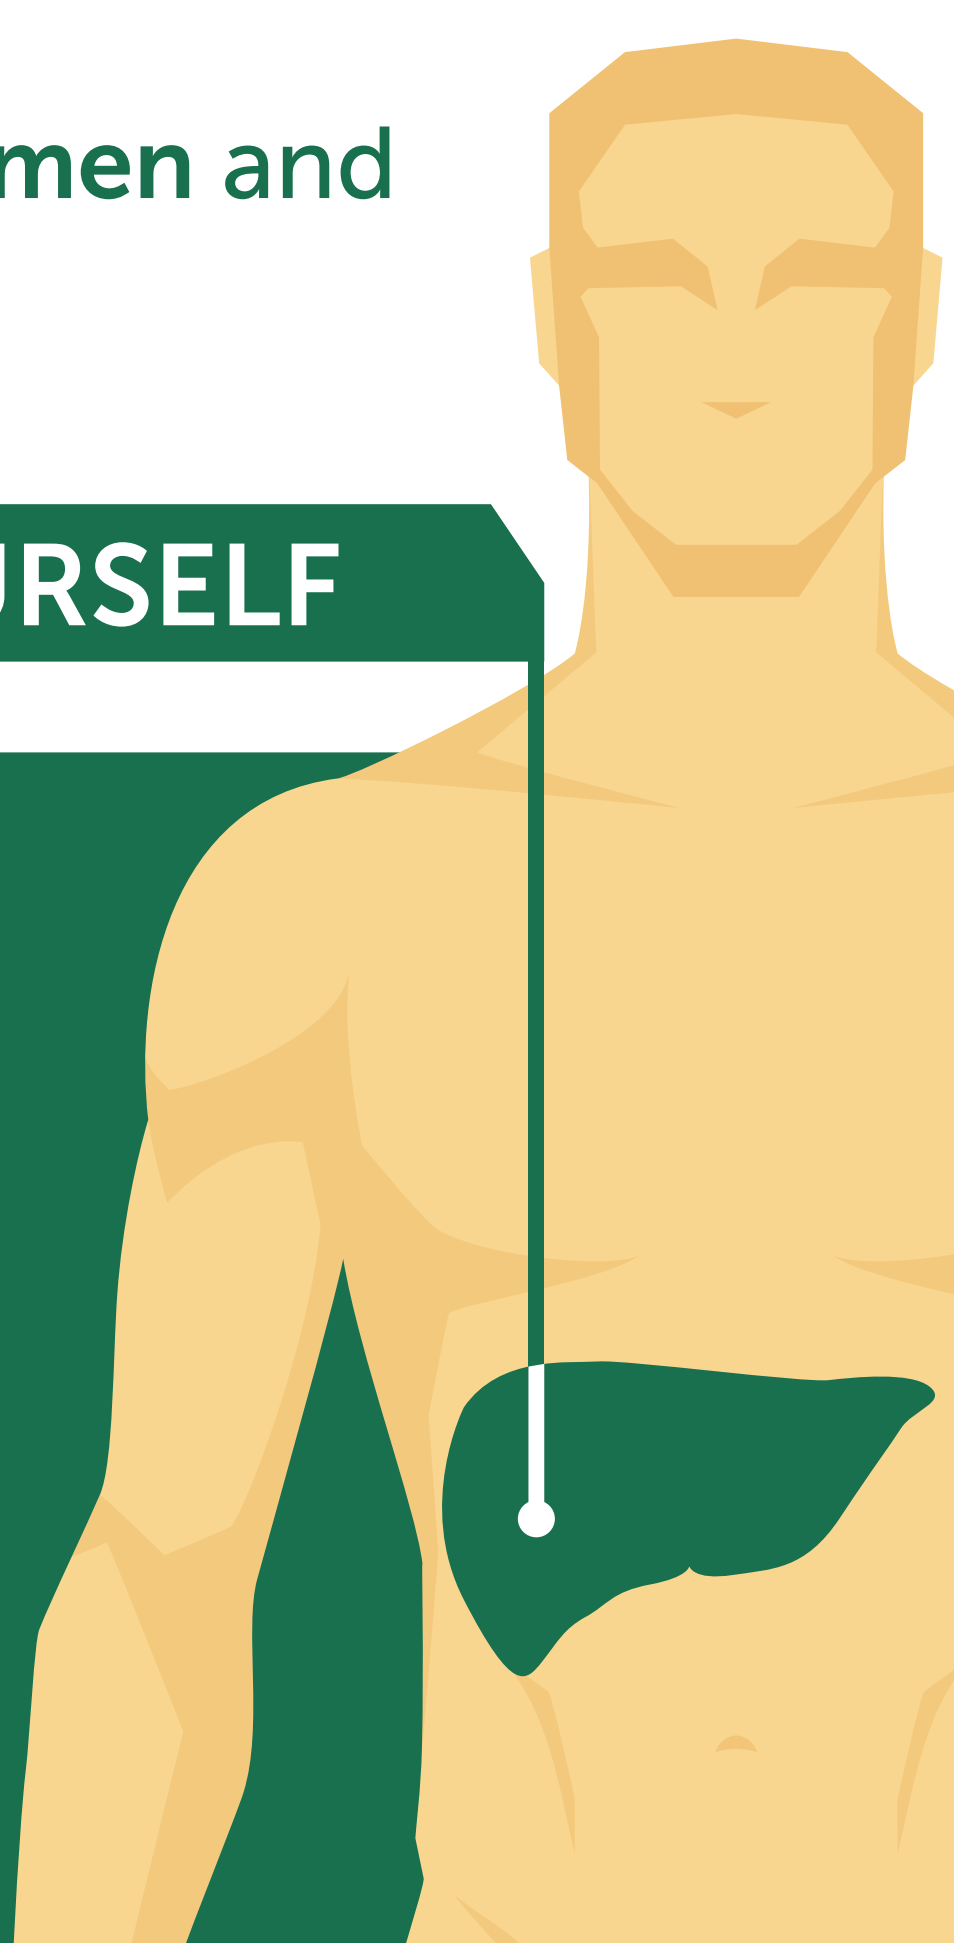

Use only sterilized tattoo and piercing instruments

Use condoms correctly and consistently

Where possible, choose oral medications instead of injections

**GET TESTED!**  
YOU ARE AT RISK IF:

You've ever had medical or dental treatment with unsterile instruments

You've received a blood transfusion in a country that does not test for hepatitis

Your mother was infected with hepatitis when you were born

You have ever injected drugs

You are living with HIV

More than **1 MILLION PEOPLE DIE** each year from disease caused by **hepatitis B & C**.

Most of those infected don't know they have it, **INCREASING THE RISK** of developing severe liver disease and transmitting the virus to others.
