	Haiti	8	44		Sporadic cases
	Jamaica	26	4	1	Clusters of cases
	Martinique	66		1	Clusters of cases
	Montserrat	2	8		Sporadic cases
	Puerto Rico	51	71	2	Clusters of cases
	Saint Barthelemy	3			Sporadic cases
	Saint Kitts and Nevis	2			Sporadic cases
	Saint Lucia	3			Sporadic cases
	Saint Martin	11			Sporadic cases
	Saint Vincent and the Grenadines	1	1		Sporadic cases
	Sint Maarten	2	8		Sporadic cases
Suriname	7			Sporadic cases	
Trinidad and Tobago	60		1	Clusters of cases	
Turks and Caicos*	1	12	0	Sporadic cases	
Virgin Islands (UK)				No cases	
Virgin Islands (US)	17			Clusters of cases	
Subtotal	892	709	19		
Total	75,712	15,572	1,065		

* **ERRATUM:** On 25 March 2020, one (1) COVID-19 death in Turks and Caicos (TCI) was erroneously reported on the table - this has now been amended. More information is available from the TCI Government at: <https://www.gov.tc/moh/coronavirus/news/36-death-at-tci-hospital>

New Country

Data Updated

Note: WHO recommends using the following categories to describe **transmission patterns** at national and sub-national levels (wherever possible) to guide decisions for preparedness.

Category number	Category name	Definition
1	No cases	Countries/territories/areas with no cases
2	Sporadic cases	Countries/territories/areas with one or more cases, imported or locally detected
3	Clusters of cases	Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
4	Community transmission	Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: - Large numbers of cases not linkable to transmission chains - Large numbers of cases from sentinel lab surveillance - Multiple unrelated clusters in several areas of the country/territory/area
