

Global 1,313,087 cases 74,289 deaths 209 countries/territories/areas

HIGHLIGHTS

In the Region of the Americas, the French Overseas Collectivity of Saint Pierre and Miquelon confirmed their first case of COVID-19. **With this event, confirmed cases of COVID-19 have been reported from all 54 countries/areas/territories in the region of the Americas.**

- To date**, a total of 417,607 confirmed and probable cases, including 12,770 deaths have been reported from all 54 countries/territories in the Region of the Americas (see Table on page 3). Of the total, there are 417,416 confirmed cases including 12,597 deaths and 191 probable cases including 173 deaths.
- In the past 24 hours**, an additional 33,172 cases and 1,500 deaths were reported – a 9 % (cases) and 13% (deaths) relative increase compared to the previous day. The cases were reported from 35 countries/territories and the deaths were reported from 19 countries/territories.
- Two countries** contribute to 91% of the total cases in the region – the United States of America (87%) and Canada (4%) reported a total of 349,633 cases to date. **The remaining 37,223 cases** were reported from the other 52 countries/areas/territories in the region to date.
- The United States** also continues to report 85% of the total deaths in the region. New York State reported 731 deaths in the past 24 hours – the largest increase in a single day since the start of the outbreak – for a total of 5,489 deaths to date. Other states with an incidence rate of more than 100 cases per 100,000 population includes Washington, Michigan and Louisiana states (see Map 1).
- In Canada**, approximately 50% (8,580) of the total cases and 35% (121) of the total deaths were reported from Quebec Province. The province also has the highest incidence of cases in the country with more than 100 cases per 100,000 population .

China lifted the lockdown on Wuhan – the city in Hubei Province where the virus was first detected. On 6 April China reported 0 local cases, 32 imported cases, and 0 deaths for the first time since the outbreak began.

New Country/area/territory

Note: WHO recommends using the following categories to describe transmission patterns at national and sub-national levels (wherever possible) to guide decisions for preparedness, readiness and response activities.

Category number	Category name	Definition
1	No cases	Countries/territories/areas with no cases
2	Sporadic cases	Countries/territories/areas with one or more cases, imported or locally detected
3	Clusters of cases	Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
4	Community transmission	Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: <ul style="list-style-type: none"> - Large numbers of cases not linkable to transmission chains - Large numbers of cases from sentinel lab surveillance - Multiple unrelated clusters in several areas of the country/territory/area
