

COVID-19

Guidelines for primary production workers

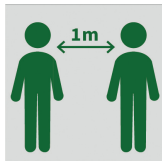

Wash your hands frequently.

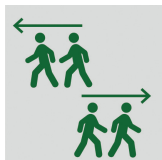

Use the recommended PPEs.

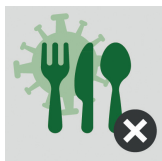

Allow the access to the premises only to essential workers.

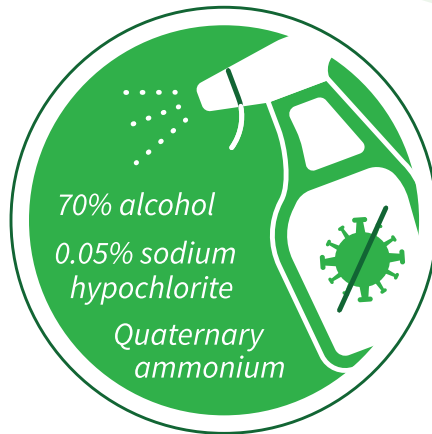

Practice physical distancing of at least 1 meter between people.

Organize the staff in work shifts.

Do not share utensils with your work colleagues.

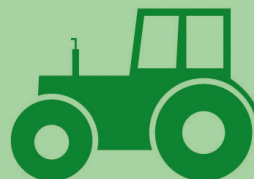

Sanitize all high-contact surfaces, including tools and vehicles.

WARNING:

COVID-19 virus survives up to 72h on plastic and stainless steel, 24h on paper and up to 4h on copper.

Sanitize all contact surfaces of utensils and vehicles.
