

This situation update is on the Novel Coronavirus (COVID-19) reported cases and deaths, Globally, Regionally, for Barbados and Eastern Caribbean Countries, French Territories, and the United Kingdom Overseas Territories.

## The Region of the Americas accounts for majority of new COVID-19 deaths worldwide

The Region of the Americas accounted for 64% of the new deaths reported globally over the prior two months, numbering more than 213,000 new deaths, though it only makes up about 13% of the global population, according to a new Epidemiological Update published by the Pan American Health Organization (PAHO).

The epidemiological update notes that the majority of the new deaths globally were reported by Brazil, with 19%, the United States of America, with 16%; India, comprising 13%; and Mexico, making up 12%.

The number of cases worldwide has increased by 158%, with some 14 million additional cases, since the PAHO report published June 23. Deaths rose by 72%, comprising some 300,000 additional deaths.

In the Region of the Americas, “while COVID-19 cases seem to have steadied in some countries and territories at the national level (e.g. the United States and Canada), daily notification rates are now accelerating in other countries and territories, many of which are experiencing larger outbreaks for the first time since the onset of the pandemic in the Region (e.g. countries and territories in the Caribbean subregion),” the PAHO update noted.
