

Situation in The Bahamas & Turks and Caicos Islands 18th March 2021.

On 30th January 2020 the World Health Organization (WHO) declared Novel Coronavirus (COVID-19) a public health emergency of international concern. As of 18th March 2021, there were 121,110,648 cases and 2,679,516 deaths reported globally. The Region of the Americas accounted for 53,536,387 confirmed cases and 1,278,792 deaths.

On 15th March 2020, the first confirmed case of COVID-19 was reported in The Bahamas. On 23rd March 2020, the first confirmed case was reported in The Turks and Caicos Islands.

HIGHLIGHTS The Bahamas

Since 11th March 2021, there were 139 newly confirmed cases.

Among the new cases:

- Forty-eight percent (48%) were from New Providence, thirty-five percent (35%) were from New Providence, and nine percent (9%) were from Abaco;
- 60 (43%) males, 62 (46%) females, and 17 (12%) unknown;
- 5 cases (4 from New Providence and 1 from Grand Bahama) were travel-related.

Among total confirmed cases:

- 72,903 real time PCR (RT-PCR) tests have been conducted to date.

Turks and Caicos Islands (TCI)

Since 11th March 2021, there were 74 newly confirmed cases and one new death.

Among the new cases:

- Sixty-five percent (65%) were from Providenciales and twenty-six percent (26%) were from Grand Turk;

Among total confirmed cases:

- 1166 (51.8%) males, 1065 (47.3%) females and 22 (1.0%) unknown gender (data to 17th March 2021);
- The age distribution of all cases (data to 17th March 2021) is 0-5 (1.9%), 6-19 (9.4%), 20-29 (19.0%), 30-39 (24.3%), 40-49 (21.1%), 50-59 (13.6%), 60-79 (7.8%), 80 and over (0.7%), and unknown (2.3%);
- 558 persons are quarantined/home isolation;
- 18,255 real time PCR (RT-PCR) tests and 1195 Rapid Antigen Tests have been conducted to date.

The Bahamas

Island	Confirmed cases	Deaths
New Providence	6269	144
Grand Bahama	1340	24
Abaco	291	6
Eleuthera	170	1
Exuma	122	1
Bimini/Cat Cay	116	2
Berry Islands	57	1

1 Turks and Caicos
Non-COVID-related Deaths

15 Bahamas
Deaths under investigation

PAHO RESPONSE

- ✓ Donation of laboratory supplies
- ✓ Risk assessment and situational analysis
- ✓ Technical guidance
- ✓ Communication
- ✓ Support to local authorities on surveillance and health systems planning

The Bahamas

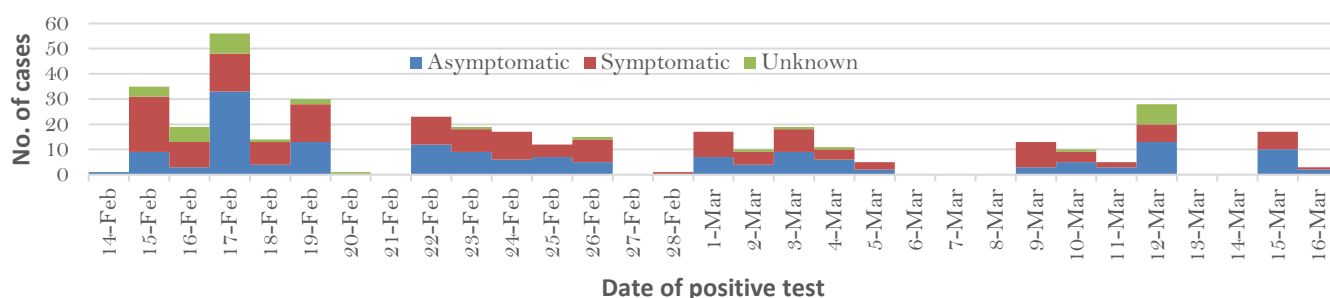

- Emergency Orders have been extended to 23rd May 2021.
- Nightly curfews continue for Abaco, Mainland Eleuthera, Mainland Exuma and New Providence from 10:00 pm to 5:00 am and on Grand Bahama, 11:00 pm to 5:00 am, Mondays to Sundays.
- Special provisions were announced for Easter Sunday, 4th April 2021, in which the nightly curfew will end at 4:00 am on all islands.
- Vessels and travellers from Haiti are not allowed to enter the country from 13th March 2021 to 11th April 2021.
- Effective 18th March 2021 attendance at graveside services and internments were increased to 40 persons excluding the officiant and mortuary staff throughout all islands.
- Effective 18th March 2021 weddings are permitted in a religious facility following protocols in place for attendance at such a facility.

Turks and Caicos Islands (TCI)

- Protocols related to social distancing, wearing of masks and other related measures including screening for travel have been extended to 31st March 2021.
- The public health regulations set to expire on 17th March 2021 were extended to 2nd April 2021.
- Fines for businesses in violation of the regulations were revised and include business closures for 8 days and 15 days after the second and third violations respectively.
- The use of log books at social events and gatherings as well the ban on cruise ship arrivals will continue through to August 2021.
- Pleasure crafts with a capacity of 10 persons may carry up to six persons and those with a capacity greater than 10 persons may carry a maximum of 30% occupancy. There are to be no boat parties.
- A food stimulus programme will be implemented in which food vouchers will be distributed by local non-governmental organizations.

February 14 - March 16, 2021

NATIONAL RESPONSE

The Bahamas Ministry of Health (MOH)

- While there is a decrease in newly confirmed COVID-19 cases, daily new confirmed cases of COVID-19 continue to be reported in The Bahamas.
- There continues to be an increase in newly confirmed cases on the islands of Abaco, Grand Bahama and New Providence.
- MOH released a statement to advise the public that the batch of donated Astra Zeneca COVID-19 vaccine from India were not of the same batch as those suspended for distribution in some European countries.
- Distribution of the donated doses of Astra Zeneca COVID-19 vaccines commenced on 14th March 2021 with a pilot exercise at Loyola Hall. A total of 110 persons participated in this exercise which included healthcare workers, auxiliary staff, uniformed officers and lay persons.
- On 17th March 2021, COVID-19 vaccination rollout commenced at the Princess Margaret Hospital, Sandilands Rehabilitation Centre, and Doctors Hospital, and continued at Loyola Hall. Persons older than 65 years were invited to participate in this rollout exercise along with healthcare workers.
- The national authorities continue to require negative real time PCR tests from arriving travelers, the completion of a daily on-line survey for fourteen days after arrival and depending upon the responses, rapid antigen testing five and ten days post entry for all in-coming travelers, including citizens and residents.
- COVID-19 samples have been sent out of country for genomic sequencing to ascertain whether any variant strains are in-country.
- COVID-19 laboratory PCR testing continues at the National Reference Laboratory (NRL), Princess Margaret Hospital (PMH), Rand Memorial Hospital and private sector laboratories.
- The Contact Tracing Command Centre is still operational, although with a decrease in the number of volunteer contact tracers. An on-line contact tracing course continues to be offered through the University of The Bahamas (UB).
- A SharePoint platform is utilized for multiple user entry of contact tracing data, case investigation and laboratory test results whilst Go.Data is used for epidemiology analysis of a subset of exported data variables.
- Moderate to severe suspected and confirmed cases are treated at PMH, Doctors Hospital West and Rand Memorial Hospital.
- The Public Hospital's Authority continues to distribute PPEs across all public hospitals and clinics.
- MOH continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.
- MOH continues to implement a communication campaign to increase immunization coverage for influenza and other vaccines.
- Preparatory work continues towards developing the National COVID-19 Vaccine Plan, with support from PAHO. A modified distribution plan was announced in which healthcare workers, residents and staff of Senior Citizens facilities, and non-ambulatory patients in public facilities will be vaccinated from the 20,000 COVID-19 vaccine donation.
- The communication campaign for COVID-19 vaccine continues.

Turks and Caicos Islands (TCI) Ministry of Health

- There has been an increase in the daily number of new confirmed cases of COVID-19.
- COVID-19 vaccine distribution and community testing continued. Vaccinations for “at home elderly” commenced 15th March 2021 on Providenciales. As of 14th March 2021, a total of 11,283 persons received the first dose of the Pfizer BioNTech COVID-19 vaccine, representing thirty-two percent (32%) of the adult population.
- The United Kingdom Variant COVID-19 B.1.1.7 was confirmed to be in-country via genomic sequencing of one confirmed sample.
- Persons continue to register for the COVID-19 vaccine via the online portal which is available in three languages: English, French-Creole, and Spanish.
- Go.Data is being utilized for field data collection and contact tracing investigations.
- Community drive-through services continue to provide access to COVID-19 tests throughout the islands.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing and 17,163 tests were completed to date. Testing has been expanded to include “frontline” workers and community-based testing.
- The National COVID-19 Vaccine Plan is being implemented – work having been expedited in line with the receipt of Pfizer vaccine. A national committee and a technical task force are supporting vaccine introduction policy development and implementation.
- The communication education campaign continues with communication materials on the COVID-19 vaccine shared via traditional means and social media.
- A Cuban health contingent of 20 persons continues to operate in medical facilities through a bilateral agreement between the two countries.

PAHO/WHO RESPONSE

- PAHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines and to technical assistance.
- PAHO/WHO briefing documents have been shared with both countries on COVID-19 vaccination and the emergence of COVID-19 mutant strains in different locations.

The Bahamas

- While there has been a decrease in the frequency of EOC meetings, weekly meetings continue for the COVID-19 Vaccination Rollout efforts.
- Three staff members provided data management support to MOH, assisting with coordination of data entry for cases, contacts and laboratory tests and with standardizing of analysis and reporting.
- A PAHO led Infection Prevention Control Training course was completed by 36 physicians and nurses from MOH, Public Hospitals Authority, and Department of Public Health.
- PAHO’s regional and country office HSS and EOC groups have advised the MOH on expanding acute care services in three hospitals and adjusting workflow and workplace layout to minimize risks of COVID-19 infection.
- PAHO Country Office personnel continue to participate in MOH’s planning committee for developing the country’s COVID-19 Vaccination Strategy and plan.
- MOH has requested PAHO’s assistance to procure Cepheid COVID-19 Testing kits and syringes to support the vaccine rollout.

Turks and Caicos Islands

- PAHO continues to provide technical assistance and access to technical guidelines, information and communication products, has advised on contact tracing and data management and made donations of PPE.
- Weekly virtual meetings between MOH and PAHO for discussion of the technical cooperation programme remain suspended due to focus on COVID-19 vaccine distribution exercises. However, there are plans to resume these meetings in the near future.
- A PAHO led Infection Prevention Control Training course was completed by 20 personnel from MOH.

GAPS/CHALLENGES

- Public compliance with and enforcement of public health protocols are challenges in both countries.

- Surges in travel-related cases and virus transmission among nationals and residents occurred in both countries after the re-opening of international borders, however, within-country transmission of COVID-19 currently accounts for most of the confirmed cases in both countries.
- There is a new risk to both The Bahamas and Turks and Caicos Islands from the emergence of mutant COVID-19 strains in large numbers in the United Kingdom and South Africa with evidence of spread through travel to other countries.
- CARPHA has advised Caribbean countries that it is offering genomic sequencing for COVID-19 strains through collaboration with a researcher at the University of the West Indies. Neither The Bahamas nor Turks and Caicos Islands have in-country sequencing capacity. Furthermore, The Bahamas normally experiences significant challenges to refer biological samples to CARPHA. The Bahamas has submitted samples for genomic sequencing to the WHO reference laboratory in Brazil and is awaiting results.
- Both countries require continuous supply of Cepheid Testing Kits for COVID-19. This presents a particular challenge for Turks and Caicos Islands as there are strict allocations per country by the manufacturer, Cepheid, and due to the initial kits being previously supplied through the United Kingdom (UK) Government, any additional kits will also need to be sourced through the UK Government.
- Availability of syringes is minimal, globally, and countries risk using current stocks of syringes for their National Immunization Program for COVID-19 vaccine distribution.

The Bahamas

- A tented patient facility donated by Samaritan's Purse remains available in New Providence for expanded clinical capacity.
- COVID-19 testing offered in both the public and private sectors, both real time PCR and SARS CoV-2 antigen testing are offered with a requirement to report positive results and workload through the national COVID-19 surveillance system.
- There has been a decline in infections and requirements for isolation/quarantine of frontline health, security service and other sector workers.

Turks and Caicos Islands

- There appears to be a surge in confirmed COVID-19 cases on the islands. Responsive contact tracing and epidemiological investigations are on-going.
- Stigma and discrimination of COVID-19 confirmed and suspected cases remain a concern.
- "Roll out" of COVID-19 vaccines is on-going and it will be important to document country experiences and lessons learned.
- The recent in change in government due to the recent election on 19th February 2021 may have an impact on health policies and services.
