

Tuberculosis is the leading killer of people with HIV

IN 2018, THERE WERE 251 000 DEATHS FROM TB AMONG PEOPLE WITH HIV*

862 000* PEOPLE WITH HIV FELL ILL WITH TB

ONLY **56%** OF THEM WERE DIAGNOSED WITH BOTH HIV AND TB

End preventable deaths by ensuring early access to TB treatment, life-saving antiretroviral therapy and TB preventive treatment

*The 95% uncertainty intervals are 223 000 – 281 000 for deaths and 776 000 – 952 000 for incidence.
