

COVID-19 Situation Update - 50

PAHO

Pan American
Health
Organization

World Health
Organization
REGIONAL OFFICE FOR THE
Americas

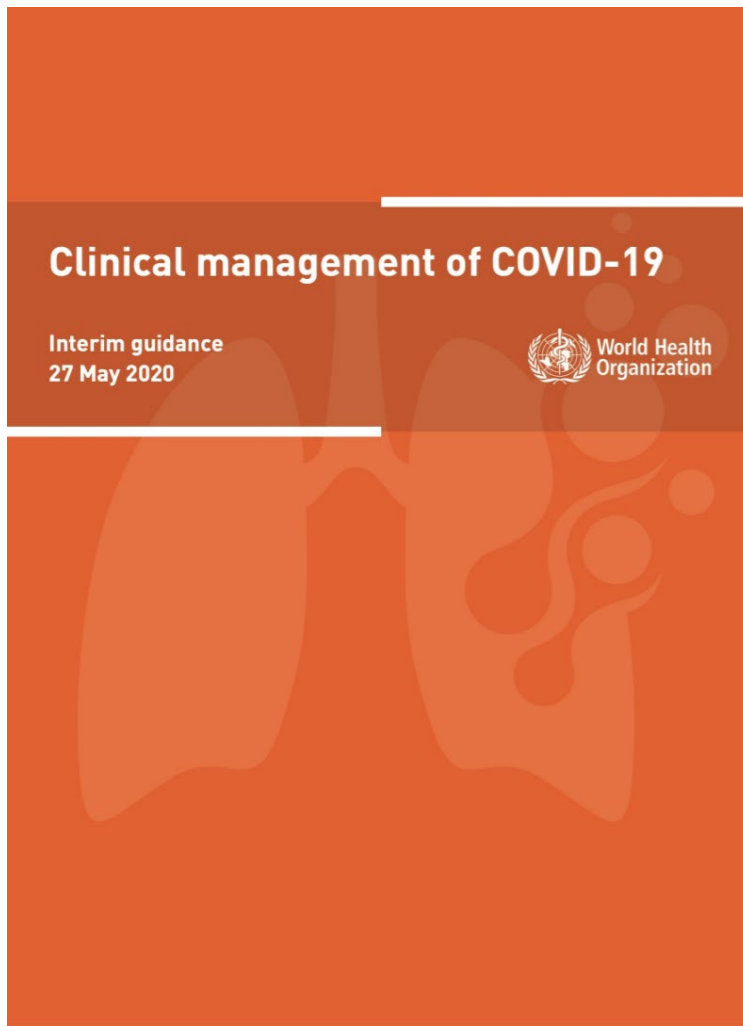

Office for Barbados and Eastern Caribbean Countries

15 June 2020

This situation update is on the Novel Coronavirus (COVID-19) reported cases and deaths, Globally, Regionally, for Barbados and Eastern Caribbean Countries, French Territories and the United Kingdom Overseas Territories.

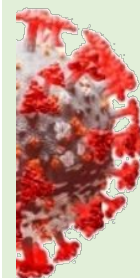

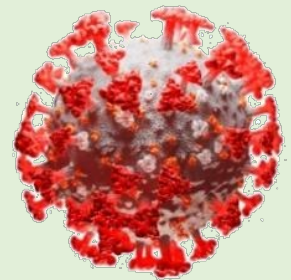

Updated WHO Clinical Management Guidelines

BE AWARE.

PREPARE.

ACT.

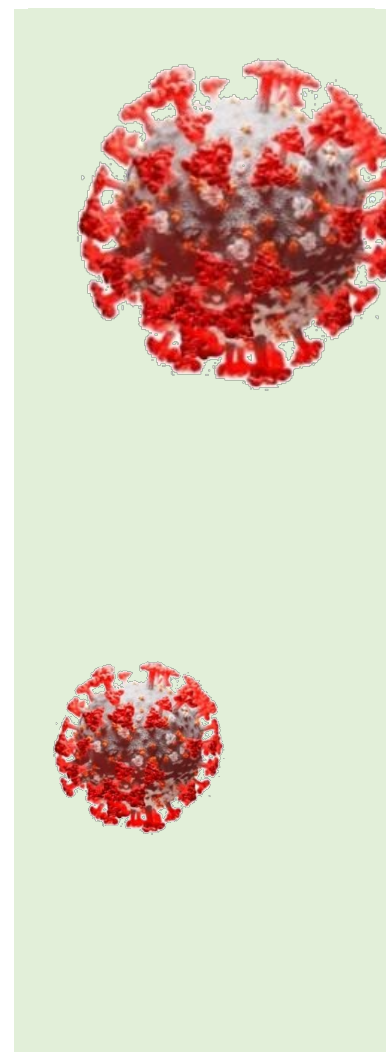

The [updated clinical management guidance](#) is based on WHO strategic objectives to end the COVID-19 pandemic and is intended for clinicians caring for COVID-19 patients during all phases of their disease (i.e. screening to discharge). Major changes are outlined in the guidance. This is an update of the existing [guidance](#) from 13 March.

See also the rapid advice guide on use of [chest imaging in COVID-19](#), which makes recommendations for the use of chest imaging in acute care of adult patients with suspected, probable or confirmed COVID-19.

COVID-19 case update: This week Barbados reported 4 new cases. French Guiana also have additional cases reported. (see *Table 1* on page 3)

Anguilla	- no new cases for 74 days
Virgin Islands (UK)	- no new cases for 30 days
Antigua and Barbuda	- no new cases for 15 days
Barbados	- last case on 15 June 2020
Dominica	- last case on 03 June 2020
Grenada	- no new cases for 22days
Montserrat	- no case for 64 days
Saint Kitts and Nevis	- no new cases for 59 days
Saint Lucia	- last case on 04 June 2020
Saint Vincent & Grenadines	- last case on 07 June 2020

Updates

Global	PAHO - Region of the Americas
8,000,041 confirmed cases,	3,899,859 confirmed cases,
436,777 deaths <i>in</i>	205,555 deaths <i>in</i>
215 countries, areas or territories	54 countries, areas or territories

Total	2088	48							

Table 1: COVID-19 status in Barbados and Eastern Caribbean Countries, French Territories and United Kingdom Overseas Territories. 'Sporadic cases only' indicates countries/territories/areas with one or more cases, imported or locally detected. 'Clusters of cases' indicates countries/territories/areas experiencing cases clustered in time, geographic location and/or by common exposures.

Data in red new.

Disclaimer: Data is updated by 5:00PM each day and there could be delays in reporting. Any discrepancies from national data figures will be edited on the next issue.

PAHO extends alliance with Twitter to provide COVID-19 information

Washington, D.C., June 15, 2020 (PAHO)—The Pan American Health Organization has extended its alliance with Twitter to provide factual, reliable information on the COVID-19 pandemic in the Americas. An agreement recently signed with the site will enable it to continue training public health social media managers and provide advertising credits to PAHO for evidence-based information dissemination on COVID-19. This is the first agreement PAHO has formalized with a social media company.

Twitter said in a statement, “As the global community faces the COVID-19 pandemic, we want to share the work we do to help people find reliable information in real time, connect with others, promote productive interactions, raise the voices of authorities and experts, and continue to protect the health of the conversation.”
