

Situation in The Bahamas & Turks and Caicos Islands 26th November 2020

On 30th January 2020 the World Health Organization (WHO) declared Novel Coronavirus (COVID-19) a public health emergency of international concern. As of 26th November 2020, there were 60,166,976 cases and 1,418,654 deaths reported globally. The Region of the Americas accounted for 25,552,814 confirmed cases and 711,358 deaths.

On 15th March 2020, the first confirmed case of COVID-19 was reported in The Bahamas. On 23rd March 2020, the first confirmed case was reported in The Turks and Caicos Islands.

HIGHLIGHTS

The Bahamas

Since 19th November 2020, there were 129 newly confirmed cases and one non-COVID-19 related death.

Among the new cases:

- Seventy percent were from New Providence and forty-three percent were Grand Bahama;
- 58 (45%) are male and 71 (55%) are female.

Among total confirmed cases:

- Eighty percent of deaths (131) were from New Providence;
- 42,751 real time PCR (RT-PCR) tests have been conducted to date.

Turks and Caicos Islands (TCI)

Since 19th November 2020, there were 20 newly confirmed cases.

Among 746 total confirmed cases:

- 347 (46.5%) are female and 398 (53.4%) are male (data to 25th November 2020);
- The age distribution of all cases (data to 25th November 2020) is 0-5 (3.6%), 6-19 (12.1%), 20-29 (19.0%), 30-39 (24.9%), 40-49 (22.4%), 50-59 (11.3%), 60-79 (5.9%), 80 and over (0.7%), unknown (0.1%);
- 132 persons are quarantined/home isolation;
- 8,169 real time PCR (RT-PCR) tests have been conducted to date.

The Bahamas

Island	Confirmed cases	Deaths
New Providence	5485	131
Grand Bahama	1012	24
Abaco	195	3
Eleuthera	144	1

7496 Bahamas
746 Turks & Caicos
Confirmed

1448 Bahamas
37 Turks & Caicos
Active Cases

5830 Bahamas
702 Turks & Caicos
Recovered

19 Bahamas
1 Turks & Caicos
Hospitalized

1 Turks & Caicos
Positive Cases that Left Country

163 Bahamas
6 Turks & Caicos
COVID-related Deaths

33 Bahamas
Non-COVID-related Deaths

22 Bahamas
Deaths under investigation

PAHO RESPONSE

- ✓ Donation of laboratory supplies
- ✓ Risk assessment and situational analysis
- ✓ Technical guidance
- ✓ Communication
- ✓ Support to local authorities on surveillance and health systems planning

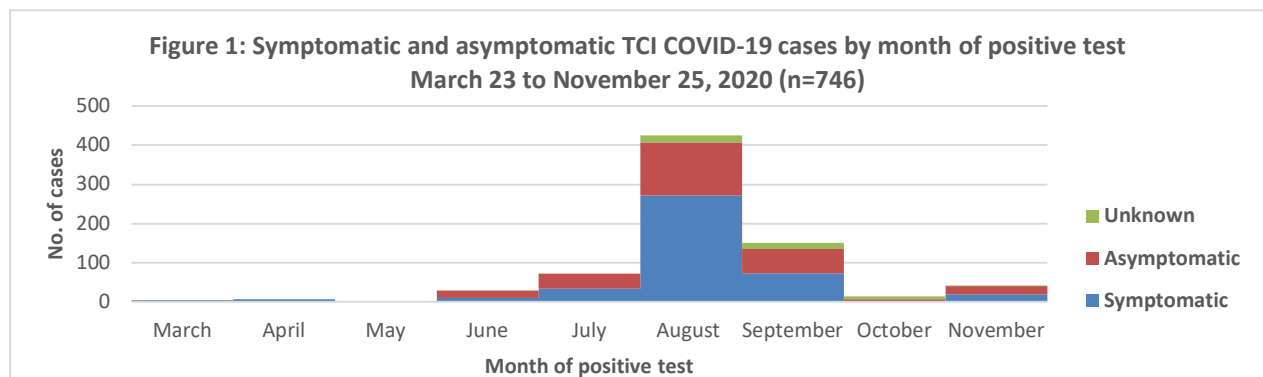

The Bahamas

- Emergency Orders have been extended through to 30th November 2020. A resolution has been put forth, however, to extend the Emergency Power Orders to 31st January 2021.
- Weekend nightly curfew continued for Abaco and New Providence and weekend lockdown continued for Mainland Eleuthera and Exuma.
- Nightly curfews continued for Abaco, Grand Bahama, Mainland Eleuthera, Mainland Exuma and New Providence.
- Group exercise is permitted on the islands of Abaco and New Providence maximum ten persons, from 5 am to 9 pm Mondays to Fridays, and 5 am to 6 pm on Saturdays and Sundays.

Turks and Caicos Islands (TCI)

- COVID-19 Control Measures are extended until 30th November 2020.
- The Second Coronavirus Employee Stimulus Cash Grant online application process commenced for first time applicants from sectors other than Hospitality and Tourism. Eligible Turks and Caicos Islander applicants from the Hospitality and Tourism may also receive a second grant upon application.

NATIONAL RESPONSE

The Bahamas Ministry of Health (MOH)

- While New Providence is the epi-center for COVID-19 in The Bahamas, there were increases in newly confirmed cases on the islands of Grand Bahama, Mainland Eleuthera and Mainland Exuma. A follow-up assessment by MOH personnel will take place on Mainland Eleuthera commencing 27th November 2020.
- The national authorities continue to require negative real time PCR tests from arriving travelers. However, they have discontinued quarantine of foreign travelers after arrival, but have replaced this with requirements for rapid antigen testing 5 and 10 days post entry.
- Daily laboratory testing continues at the National Reference Laboratory (NRL), PMH, Rand Memorial Hospital and private sector laboratories.
- The Contact Tracing Command Centre is still operational and an on-line contact tracing course continues to be offered through the University of The Bahamas (UB).
- Preparatory work continues for developing the National COVID-19 Vaccine Plan, with support from PAHO.
- A SharePoint platform is utilized for multiple user entry of contact tracing data, case investigation and laboratory test results whilst Go.Data is used for epidemiology analysis of a subset of exported data variables.
- Moderate to severe, suspected and confirmed cases are treated at PMH, Doctors Hospital West and Rand Memorial Hospital.
- The Public Hospital's Authority continues to distribute PPEs across all public hospitals and clinics.
- MOH continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.
- MOH continues to implement a communication campaign to increase immunization coverage.

Turks and Caicos Islands (TCI) Ministry of Health

- There has been a decline in the daily number of new confirmed cases of COVID-19.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing and 8,169 tests were completed to date. Testing has been expanded to include "frontline" workers and community-based testing.
- Preparatory work continues for developing the National COVID-19 Vaccine Plan, with support from PAHO.
- Community drive-thru testing for COVID-19 continued in Providenciales and at "walk-up" sites on other islands.
- Go.Data is being utilized for field data collection and contact tracing investigations.
- A Cuban health contingent of 20 persons continues to operate in medical facilities through a bilateral agreement between the two countries.

PAHO/WHO RESPONSE

- PAHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines and technical assistance.

The Bahamas

- PAHO Country Office personnel remain embedded within The Bahamas' MOH Emergency Operating Centre (EOC) to provide technical advice.

- Three staff members provide data management support to MOH, assisting with coordination of data entry for cases, contacts and laboratory tests and with standardizing of analysis and reporting.
- A PAHO led Infection Prevention Control Training course was completed by 36 physicians and nurses from MOH, Public Hospitals Authority, and Department of Public Health.
- PAHO's regional and country office HSS and EOC groups are advising the MOH on expanding acute care services in three hospitals and adjusting workflow and workplace layout to minimize risks of COVID-19 infection.
- PAHO Country Office personnel continue to participate in MOH's planning committee for developing the country's COVID-19 Vaccination Strategy and plan.

Turks and Caicos Islands

- PAHO continues to provide technical assistance and access to technical guidelines, information and communication products, has advised on contact tracing and data management and made donations of PPE. A weekly virtual meeting is convened between MOH and PAHO for discussion of the technical cooperation programme. Arrangements for COVID-19 eventual "roll out" were discussed this week.
- A PAHO led Infection Prevention Control Training course continues with 20 personnel enrolled in the course.
- On 24th November 2020, the PAHO Sub-Regional Advisor for Immunization and technical staff from the PAHO Country Office participated in a meeting with MOH personnel and provided feedback on the COVID-19 Vaccine Introduction Plan.

GAPS/CHALLENGES

- Public compliance with and enforcement of public health protocols are challenges in both countries.
- Surges in travel-related cases and virus transmission among nationals and residents occurred in both countries after the re-opening of international borders, however, within-country transmission of COVID-19 currently accounts for most of the confirmed cases in both countries.
- Tropical storms and hurricanes pose a risk to COVID-19 response efforts.

The Bahamas

- A tented patient facility donated by Samaritan's Purse increased health care capacity in New Providence. However, there are still concerns about insufficient capacity for handling severe cases.
- COVID-19 testing has been expanded in both the public and private sectors to cope with increased demands for testing. Many sites have started using antigen tests, before MOH disseminated guidance on the subject. Reporting of antigen test results compounds on-going challenges with coordination and timely receipt of results from all laboratories and test sites.
- There has been a decline in infections and requirements for isolation/quarantine of frontline health, security service and other sector workers.

Turks and Caicos Islands

- The decline in confirmation of new cases has decreased the workload for contact tracers. The Ministry of Health has initiated community-based COVID-19 testing.
- Stigma and discrimination by public towards COVID-19 confirmed and suspected cases.
