

Global 1,008,753 cases 51,772 deaths 206 countries/territories/areas

HIGHLIGHTS

In the Region of the Americas, one new area/territory reported their first confirmed COVID-19 cases – the island of **Saint Eustatius** also known locally as Statia (special Dutch municipality) reported 2 imported cases with travel to the Netherlands. Both are female, in their mid-20s and in stable condition.

- In the past 24 hours, an additional 32,070 cases and 1,202 deaths were reported – a 13% (cases) and 21% (deaths) relative increase compared to the previous day
- **In the United States of America (US)**, the New York metropolitan area has become the epicenter of the pandemic. New York state reported a total of 2,935 deaths today – almost twice the total deaths reported just 3 days ago (1,550). For the same time period since the 100th death was reported (10 days), Lombardy region in Italy was also reporting a doubling of deaths every 3 days.
- The Zandaam Holland America cruise ship has docked in Fort Lauderdale, Florida, and 14 critically ill passengers (COVID-19) have been taken to local hospitals.
- **Ecuador deaths:** Multiple media sources are now reporting on growing number of dead bodies of suspected COVID-19 victims in Guayaquil, the country's largest city. Since the Ecuador MoH has been reporting on both probable and confirmed cases and deaths (with almost all probable cases being probable deaths in Guayaquil) – PAHO has decided to include the probable cases and deaths from the country in our final case and death counts.
- **Other countries in the region with the highest number of cases** and > 10% relative increase in cases compared to the previous day during this week include Canada (11,747), Brazil (7,910), Chile (3,737) and Ecuador (3,245)

Spain is now reporting a total of 117,710 cases and 10,935 deaths, which overtakes Italy for the second most cases, behind only the United States

PAHO

Cases*

52 (+1)
Countries/areas/territories

6,880 (+21%)
Deaths*

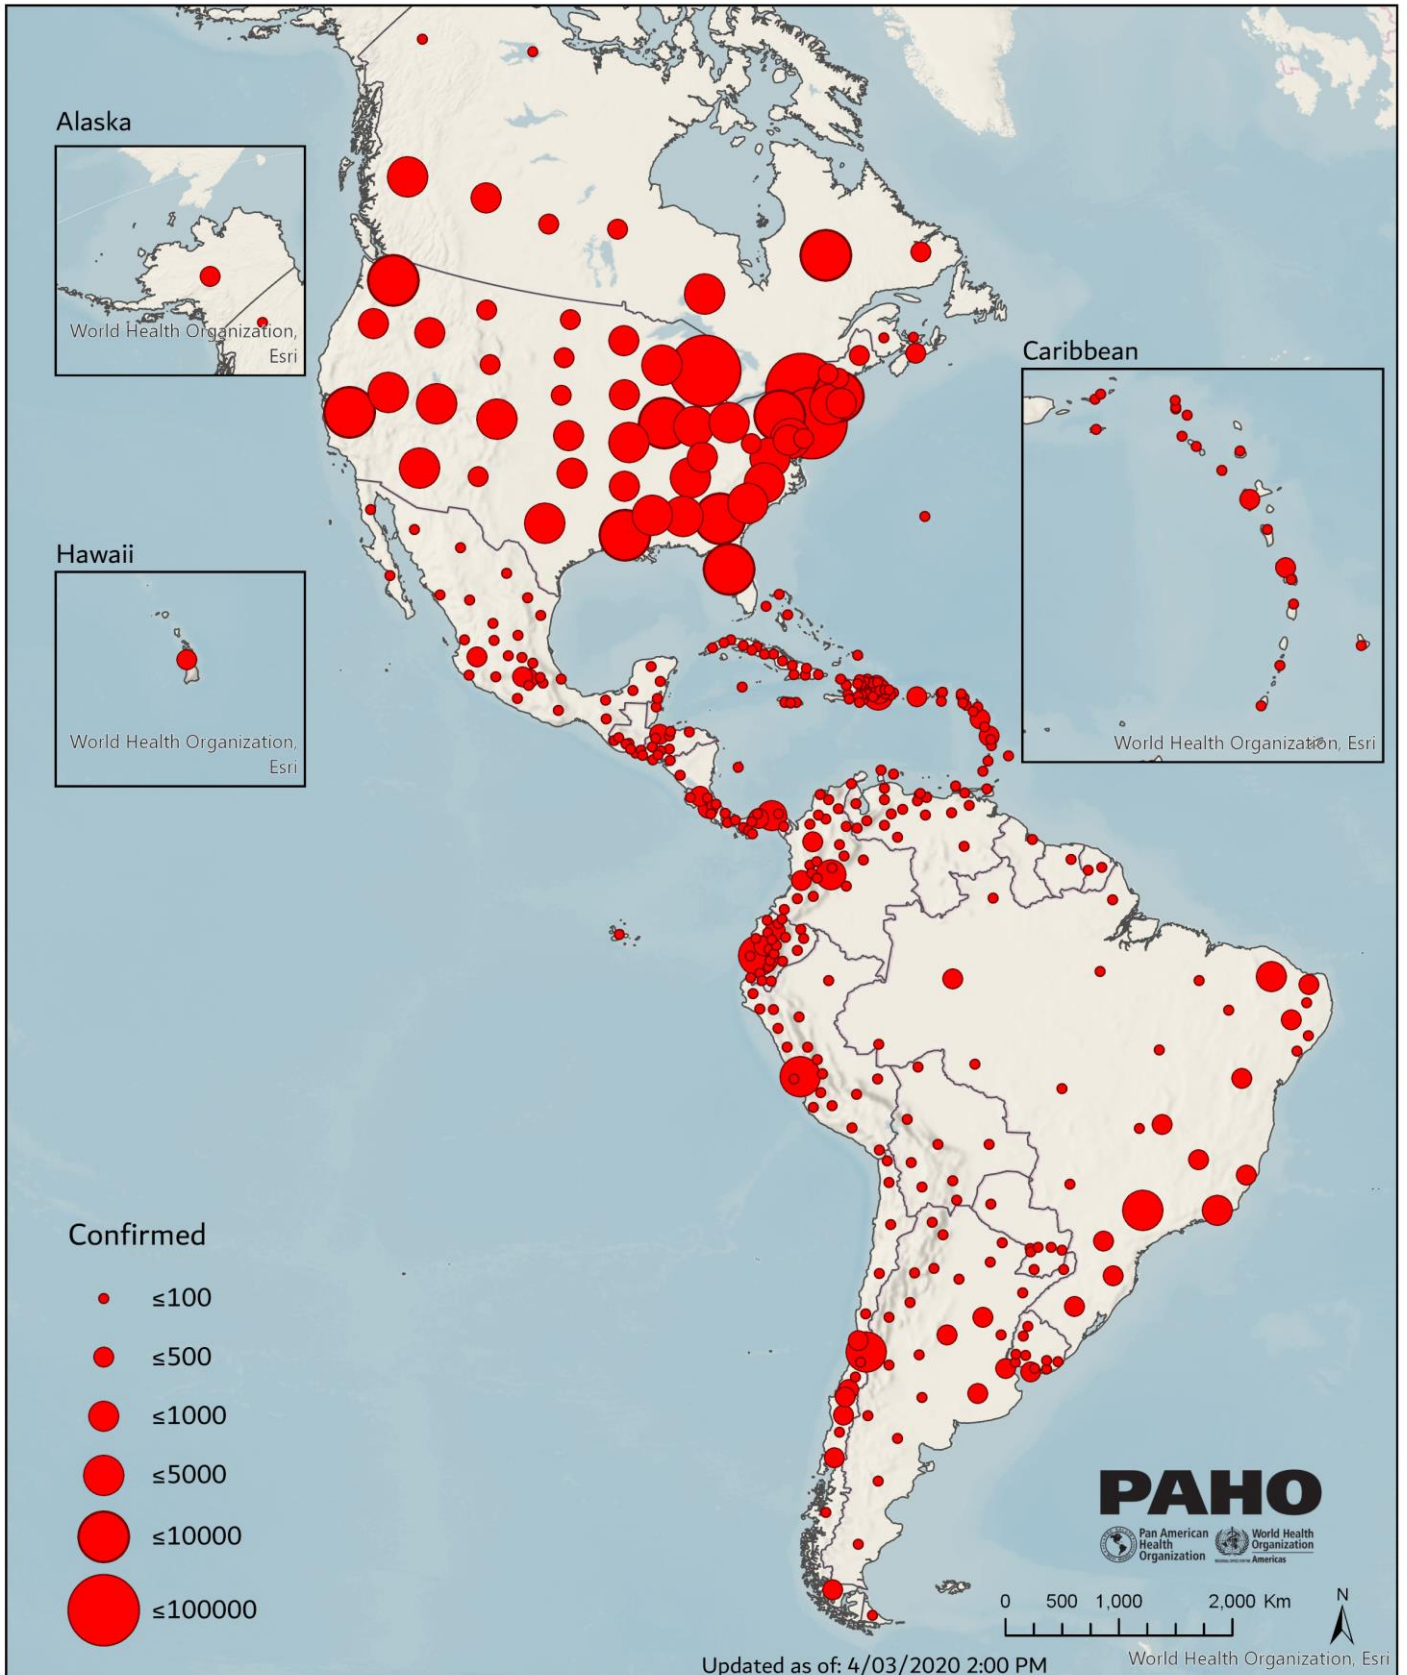

* Includes both confirmed and probable for Ecuador (cases and deaths) and Canada (only cases).

Table 1: Countries with >1,000 cumulative cases (PAHO). 4.3.2020

Country/Territory	Cases
USA	241,703
Canada	11,747
Brazil	7,910
Chile	3,737
Ecuador	3,245
Mexico	1,510
Dominican Republic	1,488
Panama	1,475
Peru	1,414
Argentina	1,265
Colombia	1,161

Table 2: Top 10 countries with highest number of COVID-19 cases in the world. 4.2.2020

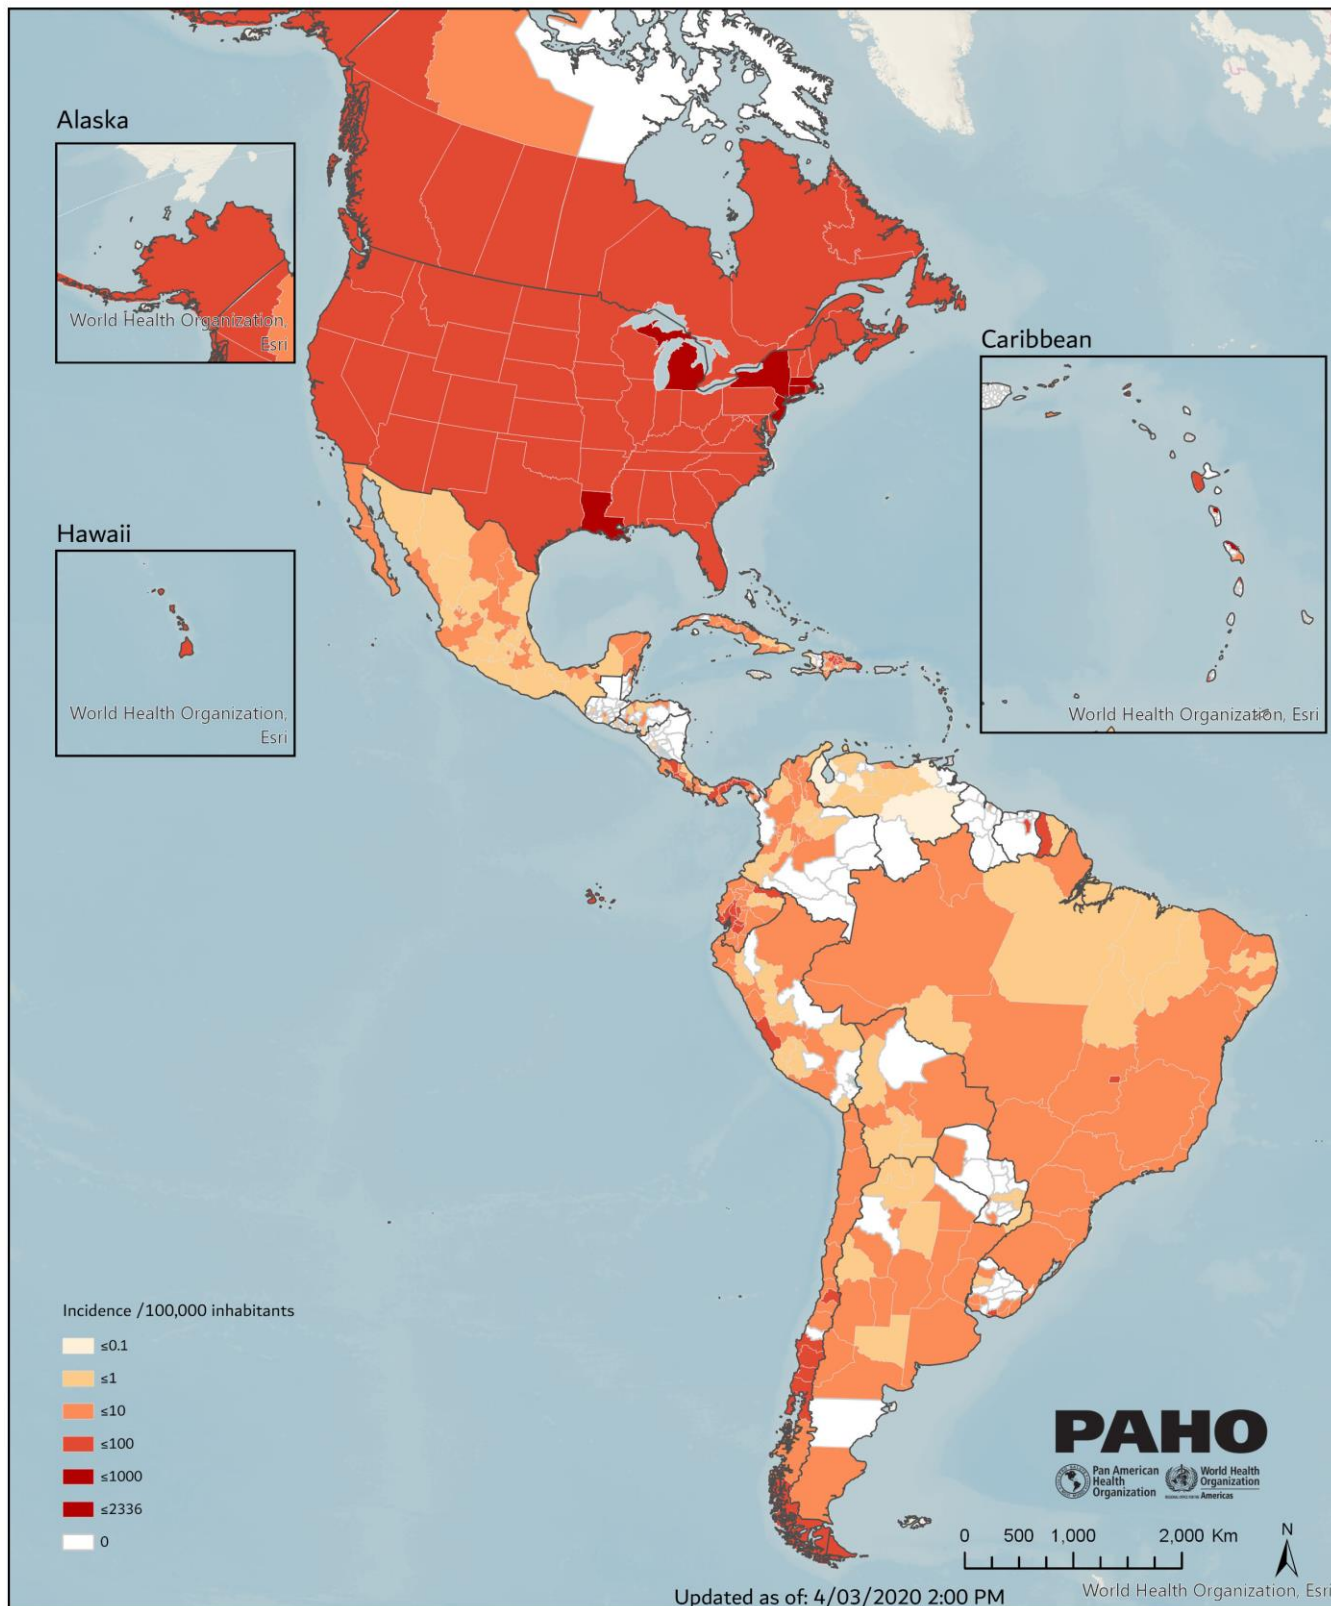

Map 1. Reported COVID-19 cases in the Region of the Americas. As of 03 April 2020

New Country

Data Updated

Note: WHO recommends using the following categories to describe transmission patterns at national and sub-national levels (wherever possible) to guide decisions for preparedness.

Category number	Category name	Definition
1	No cases	Countries/territories/areas with no cases
2	Sporadic cases	Countries/territories/areas with one or more cases, imported or locally detected
3	Clusters of cases	Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
4	Community transmission	Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: - Large numbers of cases not linkable to transmission chains - Large numbers of cases from sentinel lab surveillance - Multiple unrelated clusters in several areas of the country/territory/area
