

Global 1,092,401 cases 58,659 deaths 208 countries/territories/areas

HIGHLIGHTS

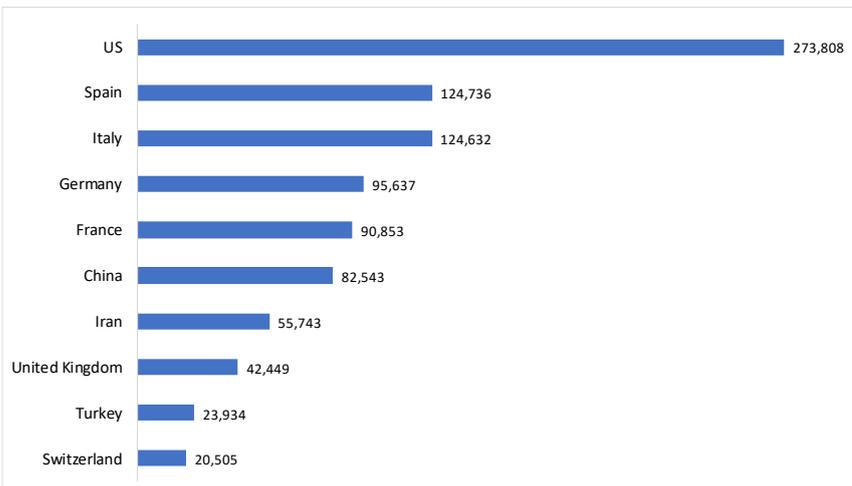

In the Region of the Americas, one new area/territory reported their first confirmed COVID-19 case. **The Falkland Islands (the) [Malvinas]** which is a South Atlantic archipelago and a British overseas territory – reported one (1) confirmed case of COVID-19 with no history of travel.

- **To date, 53 of the 54 country/area/territory in the region of the Americas** have reported at least one (1) confirmed case of COVID-19 since 21 January 2020. The French Overseas Collectivity of Saint Pierre and Miquelon – a group of islands near the Canadian province of Newfoundland and Labrador – is the only country/area/territory in the region of the Americas that has not formally reported any confirmed COVID-19 cases to date.
- **In the past 24 hours**, an additional 36,242 cases and 1,453 deaths were reported – a 13% (cases) and 21% (deaths) relative increase compared to the previous day
- **In the United States of America (US), New York state** reported a record 630 new deaths in the past 24 hours for a cumulative total of 3,565 deaths to date – 42% of the total deaths in the United States. Currently 113,704 of the total 283,621 people tested for COVID-19 in the State, tested positive (40.1%). Cases have been reported from all 50 states, Washington, D.C., and four U.S. territories.

Spain reported 7,026 new cases, for a total of 124,736. In addition, 809 new deaths including a 5-year-old was reported – the lowest toll in a week – bringing total deaths to 11,744.

France reported a drop in their number of COVID-19 patients in the ICU – 176 new patients this week versus the 486-last week.

New Country

Data Updated

Note: WHO recommends using the following categories to describe **transmission patterns** at national and sub-national levels (wherever possible) to guide decisions for preparedness.

Category number	Category name	Definition
1	No cases	Countries/territories/areas with no cases
2	Sporadic cases	Countries/territories/areas with one or more cases, imported or locally detected
3	Clusters of cases	Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
4	Community transmission	Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: <ul style="list-style-type: none"> - Large numbers of cases not linkable to transmission chains - Large numbers of cases from sentinel lab surveillance - Multiple unrelated clusters in several areas of the country/territory/area
