

## The Bahamas & Turks and Caicos Islands

12 November 2021

### SITUATION IN NUMBERS

#### The Bahamas

The first confirmed case of COVID-19 was reported on 15 March 2020. During the period 6-12 November 2021, there were 63 newly confirmed cases of COVID-19 and 4 COVID-19 related deaths.

Among the new cases:

- 55 (87%) were from New Providence;
- 24 (38%) were males and 39 (62%) were females;
- 8 cases (all from New Providence) were travel-related.

The total number of real time PCR tests conducted to 12 November 2021 was 161,919 tests.

#### Turks and Caicos Islands

The first confirmed case of COVID-19 was reported on 23 March 2020. During the period 6-11 November 2021, there were 19 newly confirmed cases of COVID-19 and 0 COVID-19 related deaths. No report was available for 12 November 2021.

Among new cases 18 (95%) were from Providenciales and 1 (5%) were from North Caicos.

Among the total confirmed cases:

- 1464 (48.3%) were males and 1566 (51.7%) were females as of 10 November 2021;

The total number of Real time PCR tests and Rapid Antigen Tests conducted to 11 November 2021 was 39,707 and 282,747 tests respectively.

#### GLOBAL

251,821,723 Cases  
5,078,617 Deaths

#### REGION OF THE AMERICAS

94,854,667 Cases  
2,316,533 Deaths

#### THE BAHAMAS

22,576 Confirmed  
184 Active  
21,534 Recovered  
45 Hospitalized  
665 Deaths

#### TURKS & CAICOS

3,030 Confirmed  
54 Active  
2,944 Recovered  
23 Deaths

### Total cases and deaths, as of 11 November 2021

#### The Bahamas

Island	Confirmed cases	Deaths
New Providence	17210	474
Grand Bahama	2558	100
Abaco	654	19

## RESPONSE

PAHO/WHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines, technical assistance and situational updates related to the COVID-19 response.

### The Bahamas

- COVID-19 vaccine distribution continued throughout New Providence and Grand Bahama.
- As of 6 November 2021, 138,073 persons received their first dose of either the Astra Zeneca or Pfizer COVID-19 vaccine, and 136,238 persons were fully vaccinated including those who received the one dose Johnson & Johnson COVID-19 vaccine.
- Several pop-up sites were announced for 13 to 14 November 2021 to include the Fish Fry, Fusion Superplex, Mall at Marathon and Southwest Shopping Centre.
- The COVID-19 Mobile Unit continues to operate and provide vaccinations to individuals who are homebound, hearing impaired, mentally challenged, physically challenged, and visually impaired as well as their caretakers.
- Restrictions continue on the amount of traffic into and out of PMH with only emergency cases being allowed for service. Hospitalizations continue to increase.
- The Public Hospitals Authority continues to request that all persons presenting to PMH for emergency care who have taken a COVID-19 test within 72 hours to present the same to the Emergency Room to accelerate triage and treatment.
- Moderate to severe COVID-19 cases continue to be treated at PMH, Doctors Hospital West and the Rand Memorial Hospital (RMH) and less severe cases at the South Beach Health Center.
- COVID-19 laboratory PCR testing continues at the National Reference Laboratory (NRL), PMH, RMH and private sector laboratories.
- A National Respiratory Surveillance Genomics Database is in use by the NRL for genetic analysis. Several genomic deletions and variant mutations have been identified by the NRL.
- The Alpha, Delta, and Gamma, variants of concern, and the Iota, variant of interest, were detected among samples previously sent to the Fiocruz Laboratory in Brazil for genomic sequencing.
- Results are pending for ten COVID-19 samples sent in March 2021 to the Caribbean Public Health Agency.
- The national authorities continue to require non-fully vaccinated travelers to have a negative real time PCR test, the completion of a daily on-line survey for fourteen days after arrival and depending upon the responses, rapid antigen testing five- days post entry for persons 12 and older only.
- Fully-vaccinated travellers, and children between ages 2 and 11 years continue to require a COVID-19 negative test (either PCR or rapid antigen) done within five days of travel into country.
- An on-line contact tracing course continues to be offered through the University of The Bahamas.
- A SharePoint platform continues to be utilized for multiple user entry of contact tracing data, case investigation and laboratory test results.
- The Public Hospital's Authority continues to distribute personal protective equipment across all public hospitals and clinics.
- Ministry of Health continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.
- Ministry of Health, in collaboration with PAHO/WHO and other partners, continues to implement a communication campaign to increase immunization coverage for influenza and other vaccines.
- Work continues in adapting and implementing the National COVID-19 Vaccine Plan to the changing situation with respect to access to vaccines, with support from PAHO/WHO.

### Turks and Caicos Islands

- COVID-19 vaccine distribution continued throughout the islands including for children ages 12-15 years of age.
- More than 77.5% of the population is fully vaccinated.
- Persons aged over 50 years and the most vulnerable population continue to receive booster vaccines.
- The Alpha, Gamma and Delta B.1.617.2 Variants of Concern was confirmed to be in-country.

- Persons continue to register for the COVID-19 vaccine via the online portal which is available in three languages: English, French-Creole, and Spanish.
- Go.Data continues to be utilized for field data collection and contact tracing investigations.
- Community drive-through services continue to provide access to COVID-19 tests throughout the islands.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing.
- The communication education campaign continues with communication materials on the COVID-19 vaccine shared via traditional means and social media. COVID-19 vaccine hesitancy public service announcements were released this past week.
- A Cuban health contingent of 20 persons continues to operate in medical facilities through a bilateral agreement between the two countries.
- PAHO/WHO continues to assist with coordination for genomic sequencing of samples to the FioCruz Laboratory in Brazil.

## GAPS/CHALLENGES

- Public compliance with public health protocols and vaccination hesitancy continue to present challenges in both The Bahamas and Turks and Caicos Islands. Vaccine hesitancy is of particular concern among health care workers.
- While The Bahamas has capacity to identify the presence of COVID-19 variants, neither The Bahamas nor Turks and Caicos Islands have in-country sequencing capacity. This presents a challenge for the timely identification of new variants.
- Both countries are challenged by the limited global supply of Cepheid Test Kits and other supplies required for COVID-19 testing. Turks and Caicos Islands is particularly challenged as it is only possible for them to source Cepheid Test Kits through the United Kingdom Government.
- The Bahamas risks using current stocks of syringes for their National Immunization Programme for COVID-19 vaccine distribution due to limited global supply.
- A nursing shortage has been identified in The Bahamas and there are concerns about the delivery of healthcare services.
- In The Bahamas, 5-10% of health care workers in the public sector are in quarantine.
