

## The Bahamas & Turks and Caicos Islands

3 December 2021

### SITUATION IN NUMBERS

#### The Bahamas

The first confirmed case of COVID-19 was reported on 15 March 2020. During the period 27 November-3 December 2021, there were 76 newly confirmed cases of COVID-19 and 30 COVID-19 related deaths.

Among the new cases:

- 67 (88%) were from New Providence;
- 38 (50%) were males and 38 (50%) were females;
- 23 cases (22 from New Providence and 1 from Exuma) were travel-related.

The total number of real time PCR tests conducted to 3 December 2021 was 169,869 tests.

#### Turks and Caicos Islands

The first confirmed case of COVID-19 was reported on 23 March 2020. During the period 27 November-3 December 2021, there were 8 newly confirmed cases of COVID-19 and 0 COVID-19 related deaths.

Among new cases, 7 (87.5%) cases were from Providenciales and 1 (12.5%) case was from North Caicos.

Among the total confirmed cases:

- 1496 (48.3%) were males and 1603 (51.7%) were females as of 30 November 2021;

The total number of Real time PCR tests and Rapid Antigen Tests conducted to 3 December 2021 was 41,922 and 304,083 tests respectively.

#### GLOBAL

263,734,626 Cases  
5,234,608 Deaths

#### REGION OF THE AMERICAS

97,497,849 Cases  
2,357,674 Deaths

#### THE BAHAMAS

22,827 Confirmed  
328 Active  
21,616 Recovered  
20 Hospitalized  
701 Deaths

#### TURKS & CAICOS

3104 Confirmed  
17 Active  
3052 Recovered  
24 Deaths

### Total cases and deaths, as of 3 December 2021

#### The Bahamas

Island	Confirmed cases	Deaths
New Providence	17423	508
Grand Bahama	2569	101
Abaco	657	19

## RESPONSE

PAHO/WHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines, technical assistance and situational updates related to the COVID-19 response.

### The Bahamas

- COVID-19 vaccine distribution continued throughout New Providence and Grand Bahama.
- A pop-up site continued 27 to 28 November 2021 at the Mall at Marathon and commenced at Super Value and Quality Markets in Golden Gates and South Beach.
- On 3 December 2021, the Ministry of Health and Wellness announced the distribution of extended dose vaccines for certain groups of persons to commence 6 December 2021 on New Providence and 9 December 2021 on Grand Bahama, upon presentation of a doctor's letter confirming eligibility to receive the same.
- The COVID-19 Mobile Unit continues to operate and provide vaccinations to individuals who are homebound, hearing impaired, mentally challenged, physically challenged, and visually impaired as well as their caretakers.
- Restrictions continue on the amount of traffic into and out of PMH with only emergency cases being allowed for service. Hospitalizations continue to increase.
- The Public Hospitals Authority continues to request that all persons presenting to PMH for emergency care who have taken a COVID-19 test within 72 hours to present the same to the Emergency Room to accelerate triage and treatment.
- Moderate to severe COVID-19 cases continue to be treated at PMH, Doctors Hospital West and the Rand Memorial Hospital (RMH) and less severe cases at the South Beach Health Center.
- COVID-19 laboratory PCR testing continues at the National Reference Laboratory (NRL), PMH, RMH and private sector laboratories.
- A National Respiratory Surveillance Genomics Database is in use by the NRL for genetic analysis. Several genomic deletions and variant mutations have been identified by the NRL.
- The Alpha, Delta, and Gamma, variants of concern, and the Iota, variant of interest, were detected among samples previously sent to the Fiocruz Laboratory in Brazil for genomic sequencing.
- On 29 November 2021, as a result of the new variant of concern Omicron being identified in certain parts of the world, travel restrictions were announced for non-residents of The Bahamas travelling from Botswana, Eswatini, Malawi, Mozambique, Namibia, South Africa, and Zimbabwe within the last 14 days. For residents returning from travel from these countries, a mandatory 14 day quarantine will be imposed at their expense.
- Results are pending for ten COVID-19 samples sent in March 2021 to the Caribbean Public Health Agency.
- All incoming travellers must present a travel health visa and a negative real time PCR or rapid antigen test taken no more than 5 days prior to travel and proof of vaccination for fully vaccinated travellers and a must show proof vaccination or a negative real time PCR test taken no more than 5 days prior to travel for not fully vaccinated persons.
- All travellers from Acklins, Berry Islands, Crooked Island, Eleuthera, Inagua, and New Providence, must provide a negative real time PCR or rapid antigen test if fully vaccinated or a negative real time PCR test if not fully vaccinated at the departure point.
- An on-line contact tracing course continues to be offered through the University of The Bahamas.

- The Public Hospital's Authority continues to distribute personal protective equipment across all public hospitals and clinics.
- Ministry of Health continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.
- Ministry of Health, in collaboration with PAHO/WHO and other partners, continues to implement a communication campaign to increase immunization coverage for influenza and other vaccines.
- Work continues in adapting and implementing the National COVID-19 Vaccine Plan to the changing situation with respect to access to vaccines, with support from PAHO/WHO.

## Turks and Caicos Islands

- COVID-19 vaccine distribution continued throughout the islands including for children ages 12-15 years of age.
- More than 80% of the population is fully vaccinated with more than 3,000 booster COVID-19 shots given since inception.
- Persons aged over 50 years and the most vulnerable population continue to receive booster vaccines.
- The Alpha, Gamma and Delta B.1.617.2 Variants of Concern was confirmed to be in-country.
- Persons continue to register for the COVID-19 vaccine via the online portal which is available in three languages: English, French-Creole, and Spanish.
- Go.Data continues to be utilized for field data collection and contact tracing investigations.
- Community drive-through services continue to provide access to COVID-19 tests throughout the islands.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing.
- The communication education campaign continues with communication materials on the COVID-19 vaccine shared via traditional means and social media. COVID-19 vaccine hesitancy public service announcements were released this past week.
- A Cuban health contingent of 20 persons continues to operate in medical facilities though a bilateral agreement between the two countries.
- PAHO/WHO continues to assist with coordination for genomic sequencing of samples to the FioCruz Laboratory in Brazil.

## GAPS/CHALLENGES

- Public compliance with public health protocols and vaccination hesitancy continue to present challenges in both The Bahamas and Turks and Caicos Islands. Vaccine hesitancy is of particular concern among health care workers.
- While The Bahamas has capacity to identify the presence of COVID-19 variants, neither The Bahamas nor Turks and Caicos Islands have in-country sequencing capacity. This presents a challenge for the timely identification of new variants.
- Both countries are challenged by the limited global supply of Cepheid Test Kits and other supplies required for COVID-19 testing. Turks and Caicos Islands is particularly challenged as it is only possible for them to source Cepheid Test Kits through the United Kingdom Government.
- The Bahamas risks using current stocks of syringes for their National Immunization Programme for COVID-19 vaccine distribution due to limited global supply.
- A nursing shortage has been identified in The Bahamas and there are concerns about the delivery of healthcare services.
- In The Bahamas, 5-10% of health care workers in the public sector are in quarantine.
