RESPONSE

PAHO/WHO continues to provide both The Bahamas and Turks and Caicos Islands with access to updated technical guidelines, technical assistance and situational updates related to the COVID-19 response.

The Bahamas

- COVID-19 vaccine distribution including extended and booster dose vaccinations continued throughout The Bahamas until 12 April 2022. From 13 April through 18 April 2022, COVID-19 vaccination centers were closed due to the Easter Holiday weekend.
- On 14 April 2022, the United States Centers for Disease Control and Prevention lowered its travel advisory to The Bahamas from a Level 2-Moderate to Level 1-Low.
- Restrictions continue on the amount of traffic into and out of the Princess Margaret Hospital (PMH) and the Rand Memorial Hospital (RMH) in Grand Bahama. Emergency services are only being accommodated in the Emergency Departments. Visiting hours on the General Wards are now from 6 pm to 8 pm on weekdays and 2 pm to 4 pm on weekends.
- Moderate to severe COVID-19 cases continue to be treated at PMH, Doctors Hospital West and the RMH.
- The COVID-19 Mobile Unit continues to operate and provide vaccinations to individuals who are homebound, hearing impaired, mentally challenged, physically challenged, and visually impaired as well as their caretakers.
- COVID-19 laboratory PCR testing continues at the National Reference Laboratory (NRL), PMH, RMH, and private sector laboratories.
- A National Respiratory Surveillance Genomics Database is in use by the NRL for genetic analysis. Several genomic deletions and variant mutations have been identified by the NRL.
- The Alpha, Delta, Gamma and Omicron variants of concern, and the Iota, variant of interest, have been confirmed in country.
- An on-line contact tracing course continues to be offered through the University of The Bahamas.
- Go.Data continues to be utilized for data collection of confirmed COVID-19 cases and contact tracing.
- Health visas are no longer needed for Bahamian citizens and permanent residences returning to The Bahamas.
- The Public Hospitals Authority continues to distribute personal protective equipment across all public hospitals and clinics.
- A Cuban health contingent of 42 Cuban specialized Nurses continues to support clinical care through a bilateral agreement between the two countries.
- Ministry of Health and Wellness continues to provide telemedicine, telepsychology, mental health, and psychosocial support services.
- Ministry of Health and Wellness, in collaboration with PAHO/WHO and other partners, continues to implement a communication campaign to increase immunization coverage for influenza and other vaccines.
- Ministry of Health and Wellness, the Office of the Prime Minister and PAHO/WHO are collaborating on the implementation of a revised communication strategy for increasing COVID-19 vaccination coverage, informed by the results of a recent social mobilization project and vaccination survey.

Turks and Caicos Islands

- COVID-19 vaccine distribution continued throughout the islands, including for children ages 5-11 years of age.
- Persons 16 years and over are eligible and continue to receive booster vaccines.
- The Alpha, Gamma, Delta B.1.617.2 and Omicron Variants of Concern have been confirmed in-country.
- Persons continue to register for the COVID-19 vaccine via the online portal which is available in three languages: English, French-Creole, and Spanish.

- Go.Data continues to be utilized for field data collection and contact tracing investigations.
- Community drive-through services continue to provide access to COVID-19 tests throughout the islands.
- The National Public Health Laboratory continues to conduct COVID-19 PCR testing.
- The communication education campaign continues with communication materials on the COVID-19 vaccine shared via traditional means and social media.
- A Cuban health contingent of 20 persons continues to support operations in the TCI Hospitals through a bilateral agreement between the two countries.

GAPS/CHALLENGES

- Public compliance with public health protocols and vaccination hesitancy and resistance continue to present challenges in both The Bahamas and Turks and Caicos Islands. Vaccine hesitancy/resistance is of particular concern among vulnerable populations, health care workers and other emergency and frontline workers.
- While The Bahamas has capacity to identify the presence of COVID-19 variants, neither The Bahamas nor Turks and Caicos Islands have in-country sequencing capacity. This presents a challenge for the timely identification of new variants.
- Both countries are challenged by the limited global supply of Cepheid Test Kits and other supplies required for COVID-19 testing. Turks and Caicos Islands is particularly challenged as it is only possible for them to source Cepheid Test Kits through the United Kingdom Government.
- While a nursing shortage continues in The Bahamas, 42 Cuban nurses were hired to address this issue as well as staff burnout.
