

Cover the water tanks very well.

Remove containers left in the open that may accumulate water.

Clean gutters, drains, and air conditioner water tanks weekly.

Wash pet water bowls at least once a week.

Empty and keep unused swimming pools dry.

Brush the inside walls of barrels and drums with soap and water and keep them covered.

Properly dispose of old tires to prevent them from being left out in the open.

Protect doors and windows with wire, mesh, or mosquito nets.

Change the water in vases and pot plates once a week.

Empty and clean the external tray of the refrigerator every week.
