

# VENEZUELA (Bolivarian Republic of): CARDIOVASCULAR DISEASES PROFILE

## DEMOGRAPHIC AND SOCIOECONOMIC PROFILE

### (1) POPULATION PYRAMID (2009)

(2) Total population (2009): 28,519,913

(3) Percentage of population aged 30-69 years (2009): 39.5

(4) Life expectancy at birth (years) (2013):

Total: 74.6 Male: 71.7 Female: 77.7

(5) Literate population (15+ years old) (%) (2009): 95.5

(6) Gross national income (2012):

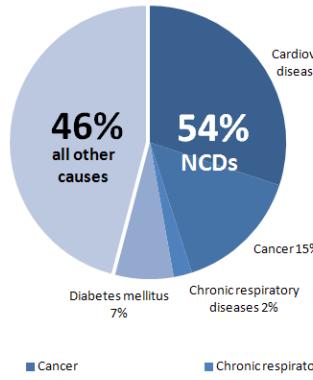

Current value (US\$ per capita): 12,470

Purchasing power parity value (international dollars): 13,120

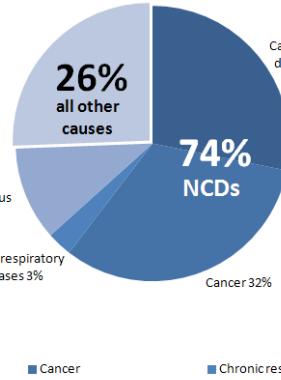

Sources: (1-2): United Nations Population Division. World Population Prospects: The 2010 Revision, New York, 2011; (3-6): PAHO/WHO. Health Situation in the Americas: Basic Indicators 2013. [Internet] Washington, D.C, United States of America, 2013. [Accessed on Feb 20, 2014]. Available from: <http://bit.ly/1jMhEzO>

## ALL CAUSE PREMATURE DEATHS (2009)

### MALE (30-69 yrs)

### FEMALE (30-69 yrs)

Total premature deaths: 38,904

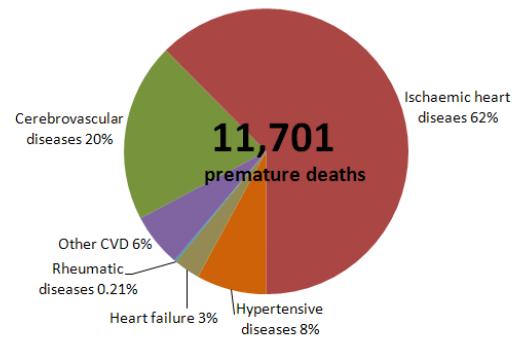

4 NCDs premature deaths: 21,046

Total premature deaths: 22,821

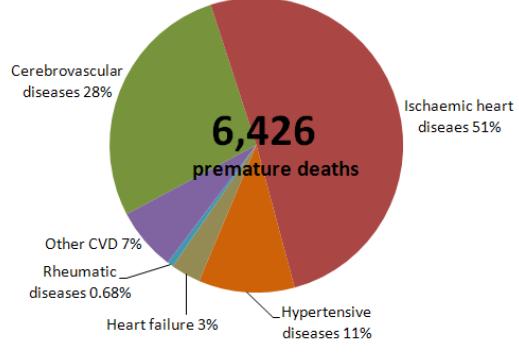

4 NCDs premature deaths: 16,981

## CARDIOVASCULAR DISEASES PREMATURE DEATHS (2009)

### MALE (30-69 yrs)

### FEMALE (30-69 yrs)

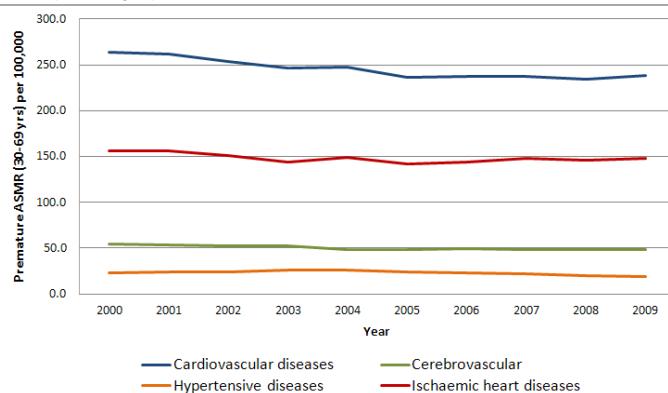

Notes: NCDs: Noncommunicable diseases; CVD: Cardiovascular diseases.

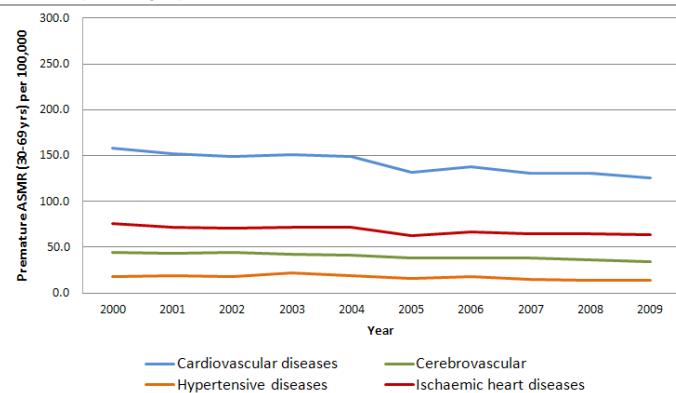

Source: PAHO/WHO Mortality information system 2014 (ICD-10: Cardiovascular diseases (I00-I99), cerebrovascular diseases (I60-I69), hypertensive diseases (I10-I15), ischaemic heart diseases (I20-I25), cancer (C00-99), diabetes (E10-14) and chronic respiratory diseases (J30-98)).

## CARDIOVASCULAR DISEASES AGE-STANDARDIZED PREMATURE MORTALITY RATES AND TRENDS (2000-2009)

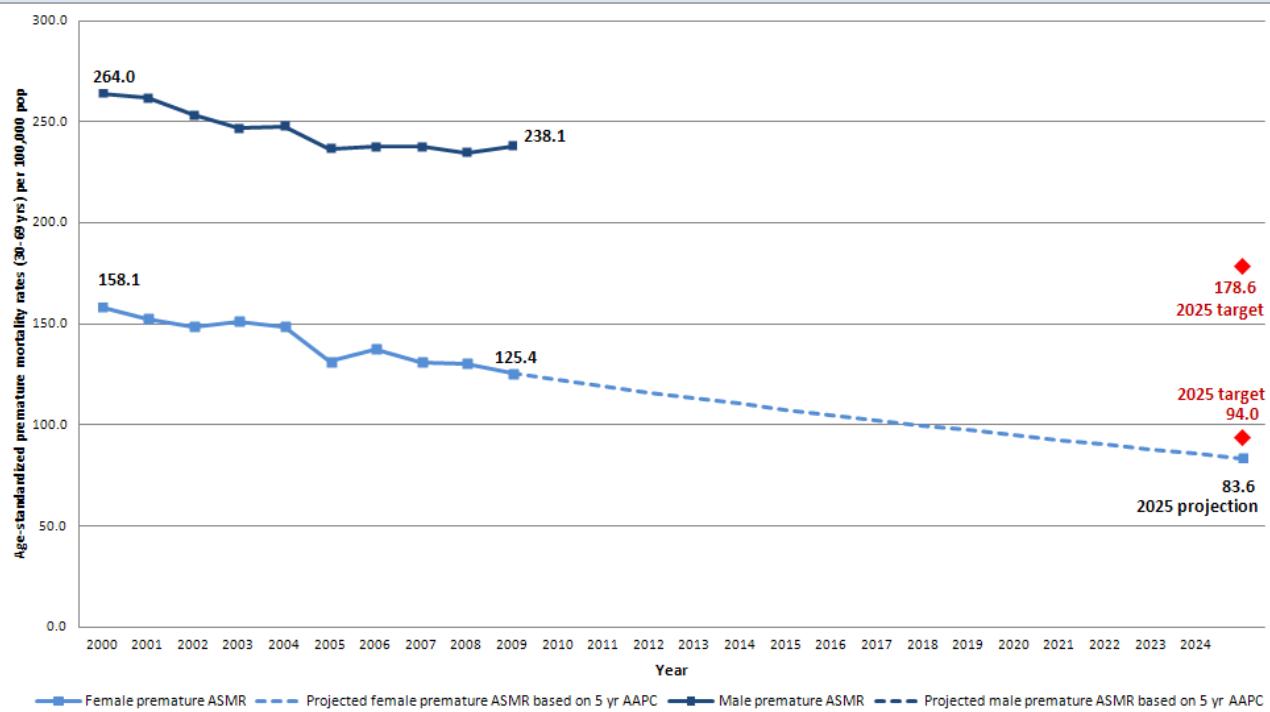

MALE (30-69 yrs)

FEMALE (30-69 yrs)

## CARDIOVASCULAR DISEASES AGE-STANDARDIZED PREMATURE MORTALITY TRENDS (2000-2009), 2025 TARGETS AND 2025 PROJECTIONS

Sex	Total CVD premature deaths (2009)	Premature ASMR (2009)	AAPC		2025 target (premature ASMR for a 25% reduction)	2025 projection (premature ASMR based on 5 years AAPC)	Difference between target and projection
			10 years (2000-09)	5 years (2005-09)			
Male	11,701	238.1	-1.3*	-0.2	178.6	N.C.	N.C. <sup>a</sup>
Female	6,426	125.4	-2.5*	-2.5*	94.0	85.8	-8.3

Notes: CVD: Cardiovascular diseases; Premature ASMR: Age-standardized premature mortality rate (30-69 years of age) per 100,000 pop.; AAPC: Average Annual Percentage Change; \*: The AAPC is significantly different from zero at p=0.05; N.C.: Not possible to calculate (no statistically significant trend was identified over the last 5 years with available mortality data); a: Based on the 2010 male premature ASMR, an AAPC of -1.7 would be required between 2010-2025 to reach the 2025 target of a 25% reduction.

A complete description of the methodology used to produce this country profile is available from: <http://bit.ly/1pQtoU4>.
