

GUYANA: CARDIOVASCULAR DISEASES PROFILE

DEMOGRAPHIC AND SOCIOECONOMIC PROFILE

(1) POPULATION PYRAMID (2010)

(2) Total population (2010): 754,493

(3) Percentage of population aged 30-69 years (2010): 38.0

(4) Life expectancy at birth (years) (2013):
Total: 66.3 Male: 63.6 Female: 68.9

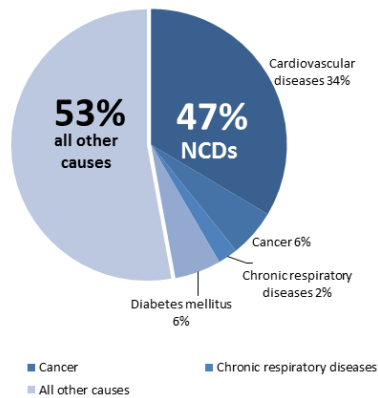

(5) Literate population (15+ years old) (%) (2009): 85.0

(6) Gross national income (2012):
Current value (US\$ per capita): 3,410
Purchasing power parity value (international dollars): 3,400

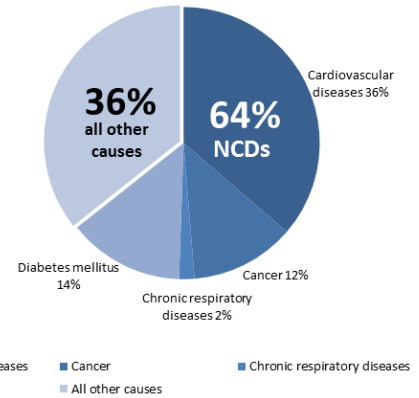

Sources: (1-2): United Nations Population Division. World Population Prospects: The 2010 Revision, New York, 2011; (3-6): PAHO/WHO. Health Situation in the Americas: Basic Indicators 2013. [Internet] Washington, D.C, United States of America, 2013. [Accessed on Feb 20, 2014]. Available from: <http://bit.ly/1jMhEzO>

ALL CAUSE PREMATURE DEATHS (2010)

MALE (30-69 yrs)

FEMALE (30-69 yrs)

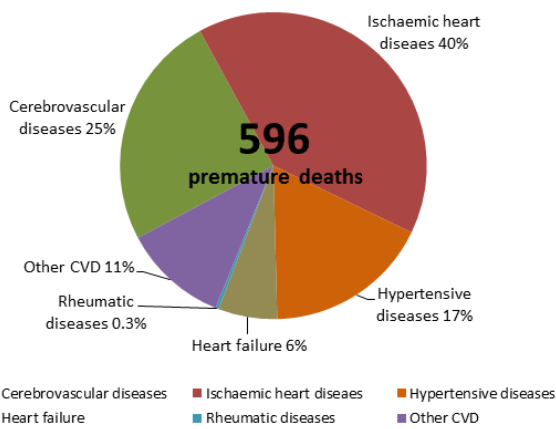

Total premature deaths: 1,776
NCDs premature deaths: 837

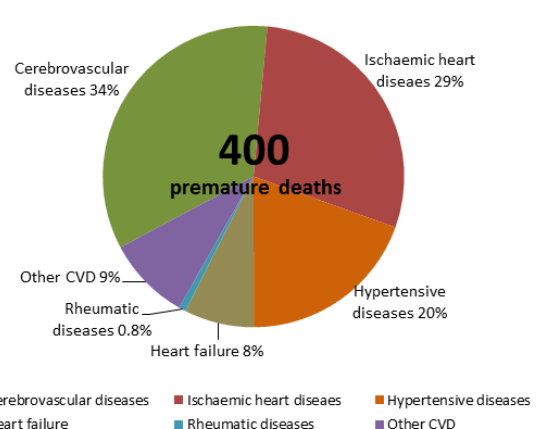

Total premature deaths: 1,102
NCDs premature deaths: 709

CARDIOVASCULAR DISEASES PREMATURE DEATHS (2010)

MALE (30-69 yrs)

FEMALE (30-69 yrs)

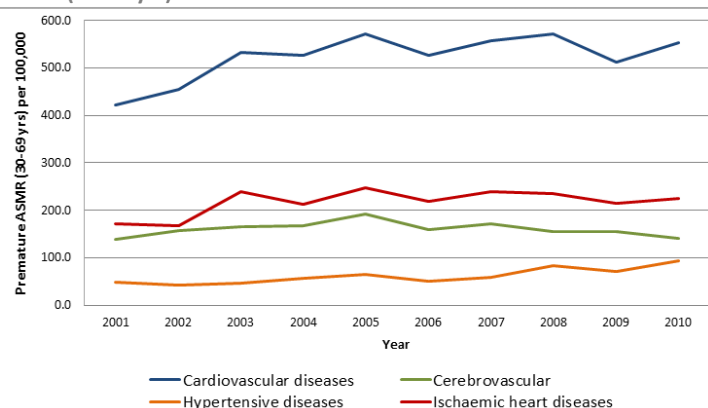

Notes: NCDs: Noncommunicable diseases; CVD: Cardiovascular diseases.

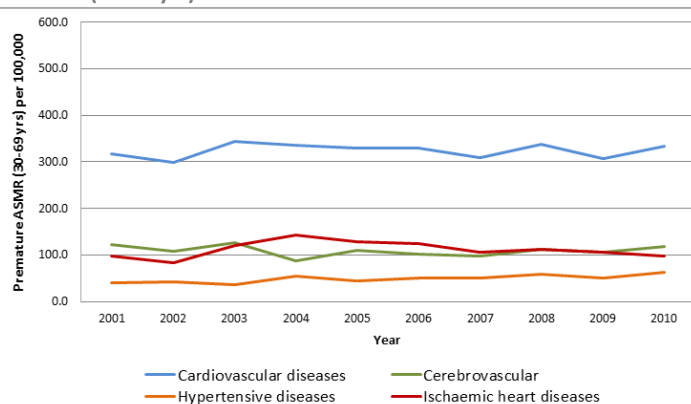

Source: PAHO/WHO Mortality information system 2014 (ICD-10: Cardiovascular diseases (I00-I99), cerebrovascular diseases (I60-I69), hypertensive diseases (I10-I15), ischaemic heart diseases (I20-I25), cancer (C00-99), diabetes (E10-E14) and chronic respiratory diseases (J30-J98)).

CARDIOVASCULAR DISEASES AGE-STANDARDIZED PREMATURE MORTALITY RATES AND TRENDS (2001-2010)

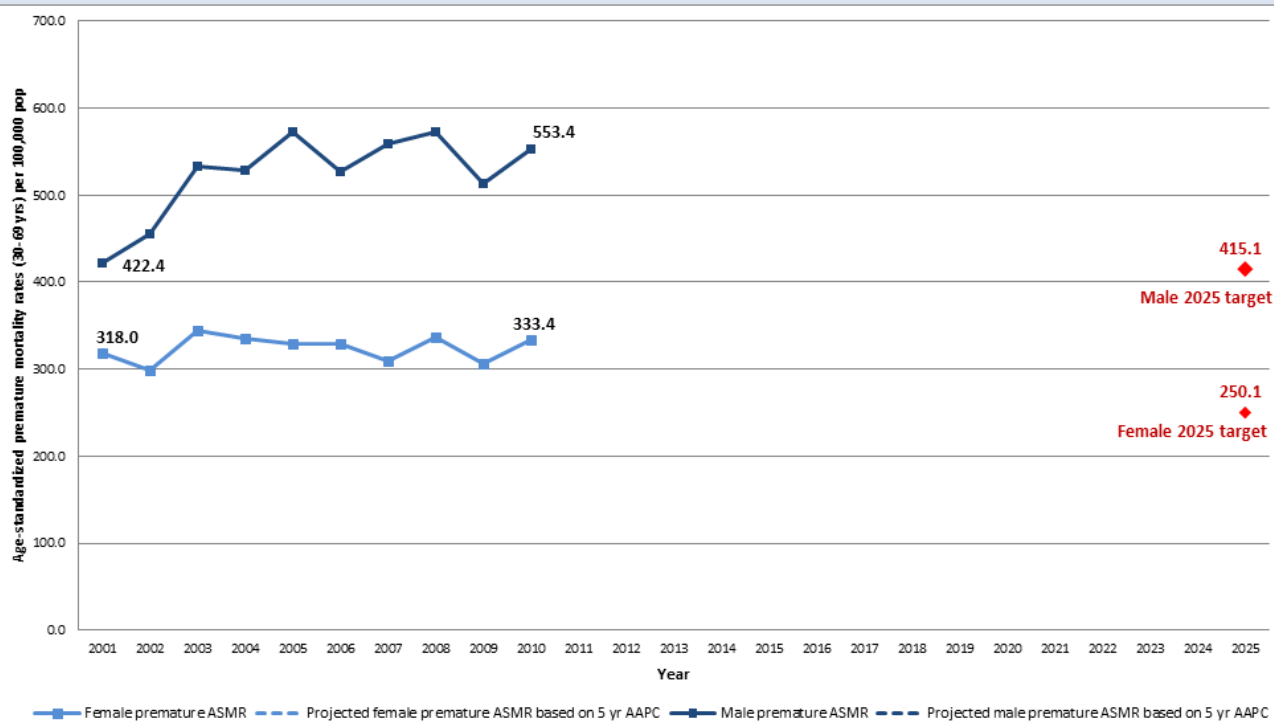

MALE (30-69 yrs)

FEMALE (30-69 yrs)

CARDIOVASCULAR DISEASES AGE-STANDARDIZED PREMATURE MORTALITY TRENDS (2001-2010), 2025 TARGETS AND 2025 PROJECTIONS

Sex	Total CVD premature deaths (2010)	Premature ASMR (2010)	AAPC		2025 target (premature ASMR for a 25% reduction)	2025 projection (premature ASMR based on 5 years AAPC)	Difference between target and projection
			10 years (2001-10)	5 years (2006-10)			
Male	596	553.4	3.2	0.4	415.1	N.C.	N.C. ^a
Female	400	333.4	0.2	0.2	250.1	N.C.	N.C. ^a

Notes: CVD: Cardiovascular diseases; Premature ASMR: Age-standardized premature mortality rate (30-69 years of age) per 100,000 pop.; AAPC: Average Annual Percentage Change; *: The AAPC is significantly different from zero at $p=0.05$; N.C.: Not possible to calculate (no statistically significant trend was identified over the last 5 years with available mortality data); a: Based on the 2010 premature ASMR, an AAPC of -1.7 would be required between 2010-2025 to reach the 2025 target of a 25% reduction.

A complete description of the methodology used to produce this country profile is available from: <http://bit.ly/1pQtoU4>.
